Loan of Regimental Chargers.

No. G. 19607-8—MILY. 79-20-6, DATED 15TH APRIL 1921.

**PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.**

GENERAL AND REVENUE DEPARTMENTS.

READ—

Letter No. 1894, dated the 20th August 1920, from the Chief Commandant, Mysore State Troops, forwarding for approval a set of rules for lending a few select regimental chargers on racing terms in view to encourage sporting spirit among the officers of the mounted units of the Mysore Troops.

Further correspondence on the subject ending with letter No. 5984, dated the 20th December 1920, from the same officer.

Order No. G. 19607-8—Mily. 79-20-6, dated 15th April 1921.

Government are pleased to approve of the rules appended to this order regulating the loan of chargers in Mysore Regiments on racing terms to officers in the mounted units of the Mysore Army. The loan of chargers should be limited to entries in the races at Mysore and Bangalore and in the race meetings at Madras only.

K. MATTEAN,
Offg. Chief Secy. to Govt.

To—The Chief Commandant, Mysore State Troops.
The Comptroller to Government.

Exd.—C. R.

**RULES RELATING TO LEASE OF CHARGERS TO OFFICERS ON
RACING TERMS.**

1. With the previous sanction of Government, chargers in the mounted units may be leased by the Chief Commandant for *bona fide* racing purposes to officers in the mounted units of the Mysore Troops. Such animals shall be entered in the races at Mysore and Bangalore and the race meetings at Madras only.

2. All applications for the lease of chargers should be made to the Chief Commandant, through the Commandant concerned, each application being accompanied by a security deposit of Rs. 250 for each horse. The deposit amount will be returned to the applicant if the application is not granted.

3. The lease will be usually for a period of two years at the expiry of which the lessee shall return the animal to the regimental charge, but the lessee may return the animal at any time within that period. When the unit from which the charger is lent, is to be mobilised for active service or garrison duty outside the State or when it is ordered away from its headquarters for any special duty, the Chief Commandant may order the lease to be cancelled forthwith and direct the charger being reverted to regimental charge. During the period of lease, the charger will remain on the strength of the Regiment and will be shown in the return as (lent on racing terms). It shall not be removed from the lines except as provided for in Rule 10.

4. Before taking the animal, the lessee should execute an agreement duly stamped in the prescribed form binding himself to abide by the conditions set forth in these rules.

N. B.—Copies of the agreements executed by the lessees will be sent by the Chief Commandant to the Secretary of the Madras T. C. and the Bangalore and Mysore Races.

5. The lessee shall be bound to provide the animal with all extra feed, training and shall do all that is reasonably necessary to keep it in sound health and condition.

6. One-fourth of the net winnings in stakes of every race won by the animal in any meeting under the turf club rules during the period of the lease should be credited by the lessee to the Mysore Government, either at the Bank of Madras or at the Bank of Mysore,

No. G. 19697-8—MILY. 79-20-6, DATED 15TH APRIL 1921.

through the Honorary Secretary of the Meeting immediately after the meeting is closed, and the Chief Commandant advised of the fact.

Note.—The expression "Net winnings" means advertised value of stakes minus the first entrance money and "striking out fees."

7. (a) If the charger leased is found to have been injured or to have suffered in condition, or otherwise been neglected by the lessee, the Chief Commandant may immediately order reversion of the animal to regimental charge and also declare that the whole or such portion as he thinks fit of the security amount deposited by the lessee is forfeited to Government.

(b) If the injury caused to the charger so called in is in the opinion of the Chief Commandant such as to render it absolutely useless, the lessee shall, in addition to the security deposit to be forfeited to Government as above, pay the value of the animal as fixed below:—

	Rs.
1. When no race is won	100
2. When the charger has won a race or races the aggregate value of which does not exceed Rs. 1,000	200
3. When it exceeds Rs. 1,000 but does not exceed Rs. 3,000	300
4. When it exceeds Rs. 3,000	500

(c) If the charger dies before the expiry of the lease, the lessee should pay Rs. 100 extra in each of the above cases (*i. e.*, according to the value of the races won by her) unless such death is due to natural causes and is supported by a certificate from a duly qualified Veterinary Surgeon or in his absence, from the Magistrate of the district.

Note.—1. The price of the animal to be recovered under this rule is in addition to the $\frac{1}{2}$ net winnings in stakes to be paid by the lessee under Rule 6.

2. The decision of the Chief Commandant in the above cases will be final.

8. A charger leased on racing terms should not be sub-leased or transferred to other officers by the lessee without the previous permission in writing of the Chief Commandant.

9. If the lessee is desirous of purchasing the animal leased to him, it may be sold by the Chief Commandant for a price fixed by him with the sanction of Government.

10. The lessee should obtain the previous sanction of the Chief Commandant for taking his charger to attend any race meeting outside the headquarters.

(1) The application should specify the date from which it will be taken from the lines and the date on which it will be returned thereto.

(2) He should also give intimation to Chief Commandant, when the charger in his possession receives any injury or dies, within three days of such occurrence.

11. The lessee should bear all charges in connection with the extra feeding, training, etc., of the charger leased to him from the day it leaves the regiment till its return thereto.

12. If during the currency of the lease there should be any breach on the part of the lessee of any of the aforesaid rules in addition to other penalties specially provided for his security deposit shall be forfeited to Government.

FORM OF AGREEMENT.

Whereas, I (A. B.).....of.....am permitted by the Chief Commandant, Mysore State Troops, to have the lease on "Racing terms" of the charger (fully described in Schedule B) the property of the Government, for a period of two years from the.....day of.....192 , on which date the said charger was made over to my charge and whereas in accordance with Rule 2 of the rules relating to the lease of such charger sanctioned by Government in their Proceedings No.....dated.....(a copy of which is annexed hereto as Schedule "A"). I have deposited a sum of Rs. 250 as security in connection with the lease to me of the charger mentioned herein, I hereby bind myself:—

Firstly, to abide by the aforesaid rules (which I hereby declare to have read and properly understood) during the period of the lease to me of the said charger failing which I shall forfeit to the Government of Mysore the sum of Rs. 250 deposited by me under Rule 2 thereof and shall also be liable for the penalties provided for under the rules.

Secondly, to return the charger leased to me to the regimental charge when ordered by the Chief Commandant under Rule 7 (a) or immediately after the expiry of the period of lease, failing which I shall be liable to pay to the Government of Mysore the sum of Rs. 1,000 as a special value of the charger and also to pay up to the credit of the Mysore Government the whole of my net winnings in races won and also all profits earned by me with the said mare after the expiry of the period of lease and until the mare is returned to the regimental charge.

Failing which the amount will be recoverable from me, my heirs, executors, administrators and representatives.

Indents for Articles of Stationery.

No. G. 19666-7—P & S. 28-20-58, DATED 15TH APRIL 1921.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS

READ—

Letter No. G. C. 142-20, dated the 28th February 1921, from the Excise Commissioner in Mysore, recommending that for reason stated the Superintendent, Government Stationery, may be authorised to comply direct with the indents of the District Excise Officers for departmental forms and books which would also include the requirements of the officers subordinate to them and stating that if deemed necessary such indents would be countersigned by him.

Order No. G. 19666-7—P. & S. 28-20-58, dated 15th April 1921.

The Excise Commissioner's recommendation that the District Excise Officers may be authorised to submit indents in respect of the requirements of their own office and of the offices subordinate to them is approved. They may send their indents direct to the Superintendent, Government Stationery. Countersignature of indents by the Excise Commissioner is not necessary (*vide* paragraph 2 of Government Order No. G. 25076-135—P. & S. 10-19-117, dated the 4th May 1920).

K. MATTHAN,
Offg. Chief Secy. to Govt.

To—The Excise Commissioner in Mysore.
The Superintendent, Government Stationery.

Indent for Stationery and Forms.

No. G. 20408-19—P. & S. 14-20-29, DATED 30TH APRIL 1921.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Paras 20 and 21 of the Stationery Rules published in the G. O. No. G. 6011-60, dated 27th May 1904, prescribing the procedure to be adopted by the several indenting officers for Stationery and printed forms.

2. G. O. No. G. 25076-135—P. & S. 10-19-17, dated 4th May 1920, authorising the subordinate officers referred in Rule 21 of the Stationery Rules read above to send their indents for stationery and forms direct to the Superintendent, Government Stationery.

3. Letter No. H. C. 112, dated 22nd March 1921, from the Commissioner of Income-Tax in Mysore, requesting that the Superintendent, Government Printing, may kindly be instructed to comply with the indents of the marginally noted officers who exercise powers of a Collector under the Income-tax Regulation for the several prescribed forms and registers required for their offices.

1. Deputy Commissioners of Districts.
2. Revenue Sub-Division Officers
3. Special Magistrate, Kolar Gold Fields
4. Special Collector of Income tax for Bangalore and Mysore Cities

Order No. G. 20408-19—P. & S. 14-20-29, dated 30th April 1921.

The Officers referred to in the Income-tax Commissioner's letter read above are authorised to indent direct on the Superintendent, Government Stationery, for Forms and Registers in accordance with the two Government Orders read above.

K. MATTHAN,
Offg. Chief Secy. to Govt.

To—The Commissioner of Income-tax in Mysore.

The Superintendent, Government Stationery.

The Deputy Commissioners of Districts.

The Special Collectors of Income-tax for Bangalore and Mysore Cities.

Medicine Chests.

No. G. 18715-74—MED. 80-16-32, DATED 5TH APRIL 1921.

**PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.**

GENERAL AND REVENUE DEPARTMENTS.

READ—

Correspondence ending with letter No. G. C. 396-19 of 19-20, dated the 24—25th January 1921, from the Officiating Senior Surgeon in Mysore, submitting a set of draft rules regulating the supply of medicine chests to Government Officers.

Order No. G. 18715-74—Med. 80-16-32, dated 5th April 1921.

The rules proposed by the Senior Surgeon are approved with slight modifications. A copy of the rules is appended to this order.

2. A list showing the number and class of medicine chests required by the several officers and the approximate cost for the same is also appended. The Senior Surgeon is requested to arrange for the supply of chests to the officers concerned on requisition, the cost being met from the budget grants of the departments concerned.

B. RAMASWAMAIYA

Secretary to Government, Revenue Department.

To—The Officiating Senior Surgeon in Mysore.
The Comptroller to Government.
The Heads of Departments.

For.—C. L.

RULES FOR THE ISSUE OF PORTABLE MEDICINE CHESTS.

1. Portable Medicine Chests of Class A. will be supplied to parties with which there is a Medical Officer or Subordinate, such as the Palace Establishment, the Head Quarter Establishment, the Forest School, and to District Medical and Sanitary Officers, for use in their tours.

2. Portable Medicine (stationary) Chests of Class B will be supplied to Government Factories and Industrial Workshops, placed under the supervision of a Gazetted Officer and having no medical officer attached.

3. Portable Medicine (travelling) Chests of Class C will be supplied to Members of Government and Provincial and District Officers of the Agricultural, Revenue, Excise, Police, Forest, Geological and Survey Departments.

4. Portable Medicine Chests of Class D will be supplied to such other officers of the above and other departments as have to frequently tour on duty in places more than ten miles away from any Government or Local Fund Medical Institutions and as may be specially declared by Government to be entitled to the use of a medicine chest.

5. The cost of the medicine chests will be paid by the department to which the officer belongs. The cost of the chests supplied to the Medical Officer, Head quarter Establishment and to Members of Council will be debited to 12, General Administration, (2.) Dewan and Members of Council.

6. The contents of the medicine chests of the several classes are detailed in the schedule hereto annexed.

7. Requisitions for refilling medicine chests or for supplying particular medicines or articles that might have run out short, should be made to the Superintendent, Medical Stores, Bangalore, through the Head of the Department, which is responsible for the payment of the cost thereof.

8. Officers who are supplied with chests must understand that the supply is meant for their own use and that of their staff whenever they may chance to fall ill and stand in need of medicines in a place visited by them on duty and far removed from any Local Fund Dispensary.

9. The contents of each chest, if judiciously used as stated in the above rule, are expected to last for one year and every extra indent or requisition during the year of supply should be supported by a statement of the circumstances that led to the necessity for such extra indent.

No. G. 18715-74—MED. 80-16-32, DATED, 5th APRIL 1921.

Reports from the District Magistrates of Districts on the condition of the Tonga Ponies plying for hire in the several districts during the half-year ended the 31st December 1920.

Order No. G 19839-46—Legis. 23-20-10, dated 20th April 1921.

Recorded.

2. There were no prosecutions during the half-year under review, either under the Public Conveyances Regulation or under the Prevention of Cruelty to Animals Regulation, 1895.

3. Government note that all the ponies in the Kadur District are reported to be fit for work and that in the other districts steps have been taken to see that ponies declared unfit are not used by the owners till they become fit for work.

4. The District Magistrate, Kolar, suggests that the Prevention of Cruelty to Animals Regulation, 1895, may be extended to the whole district. The separate reference promised by him in the matter is awaited.

**PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.**

GENERAL AND REVENUE DEPARTMENTS.

READ—

Letter No. Judl. 34-20-21, dated the 9th October 1920, from the Registrar, Chief Court of Mysore, forwarding the Report on the Administration of Civil Justice in Mysore for the year 1919-20 together with the usual statements.

Order No. G. 20022—Cts. 109-20-2, dated 25th April 1921.

Number and jurisdiction of Courts.—The total number of Civil Courts during the year was 26 as against 27 in the previous year, the temporary 2nd Munsiff's Court at Seringapatam having ceased to exist from 24th December 1919. The total number of Village Munsiff Courts working at the end of 1919-20 was 203 including 12 Courts established during the year.

2. *Original work.*—There was a marked increase in the number of institutions during the year. The number of suits filed was 39,711 against 34,224 in 1918-19, the increase being perceptible in both the Original and Small Cause Courts.

3. Including the suits pending at the end of 1918-19 as well as those refiled and remanded, the total number of suits for disposal was 55,705. Of these 37,340 suits were disposed of leaving 18,365 suits pending at the end of the year. The average duration of contested ordinary suits was 480·40 days against 481·45 in 1918-19 and that of contested Small Cause suits was 214·79 days against 195·81 in the previous year. Out of 8,840 miscellaneous cases for disposal, 6,008 were disposed of leaving 2,832 pending at the end of the year. It is explained that the high average duration of contested ordinary suits is due to the disposal of long pending suits and to the adjournment of suits to distant dates owing to heavy files in some of the Courts.

4. *Appeals.*—Out of 1,115 appeals for disposal in the District Judges' Courts, the number of appeals disposed of was 559 against 660 in the previous year, the decrease being noticeable in the District Judges' Courts at Bangalore and Mysore where the disposals were 50 against 103, and 117 against 198 respectively. The average duration of appeals in District Judges' Courts rose to 270·64 from 207·68 days in 1918-19. This might in part be due to the heavy Sessions work the District Judges had during the year under review, but still Government think that they could have easily avoided the long delay in the disposal of the appeals. The District Judge of Bangalore had the smallest number of appeals to dispose of and yet he seems to have taken the longest time for their disposal.

5. In the Subordinate Judges' Courts also the average duration of appeals rose from 213·97 to 329·47 days.

6. The Subordinate Judge of Shimoga is chiefly responsible for this increase and he attributes the high average duration to the calculation of days from the date of filing in the District Judge's Court.

7. There were 126 appeals arising out of execution and miscellaneous cases and the District and Subordinate Judges disposed of 76 appeals leaving 50 pending at the end of the year.

8. The number of regular appeals filed in the Chief Court during the year was 356 of which 49 appeals were transferred to the Court of District Judge of the Bangalore Division and 307 were retained in Chief Court. Including 244 appeals pending at the close of the previous year, the total number for disposal was 551 of which 154 appeals were disposed of as against 185 and 219 in the two previous years.

No. G. 20022—Cts. 109-20-2, DATED 25TH APRIL 1921.

The total number of second appeals for disposal was 281 of which 96 were disposed of against 132 and 190 in the two previous years. The number of first and second appeals pending at the end of the year was 397 and 185 respectively as against 246 and 111 in 1918-19 and 159 and 97 in 1917-18.

9. The following statement shows the average duration of appeals in the Chief Court during the year under review:—

1919-20		Days	1918-19
First appeals.	Normal duration	229 93	199 98 days.
	Abnormal duration	476 61	457 92 "
Second appeals.	Normal duration	182 4	100 01 "
	Abnormal duration	534 68	483 92 "

The number of disposals of both first and second appeals has decreased while their average duration has increased and it is explained that this result was due to the fact that a large number of appeals occupied a full day or more each for hearing and that in the year under review there were 21 such cases occupying 33 sittings of the Chief Court, while in the previous year there were only 10 cases occupying 11 sittings. The pendency however, has been increasing year after year which may lead to serious congestion of work in the Chief Court if the arrears are not reduced and endeavours made to cope with the institutions every year.

10. Out of 88 miscellaneous appeals for disposal 39 were disposed of, leaving 49 pending at the close of the year and out of 216 miscellaneous petitions for disposal 111 were disposed of during the year.

11. The District Judges inspected all the Courts in their divisions except the Subordinate Judge's Court at Mysore and the Judges of the Chief Court inspected the District and Subordinate Judge's Courts at Mysore and Bangalore and the Munsiffs' Courts at Chikmagalur and Narasimharajapura.

ANNEXURE

No Per 39 Encls 8—20 21, dated 12th March 1921, from A. Subramanva Iyer, Esq., B A, Inspector General of Police in Mysore Bangalore, to B Ramaswamiya, Esq., B L, Secretary to the Government of His Highness the Maharaja of Mysore, Revenue Department

I have the honor to submit the following report on the working of the Mysore Game and Fish Preservation Regulation and the rules framed thereunder for the calendar year 1920

2 The statement given below furnishes particulars of the licenses granted and the amount of license fees realised during the year as compared with the previous year —

District	1919					1920				
	District license	District license in Indian State Forests	Provincial	Agricultural	Total	District license	District license in Indian State Forests	Provincial	Agricultural	Total
Bangalore	31	1	3		43	47	3	19		61
Kolar	23				23	145	12			157
Tumkur	6				6	6				6
Mysore	17	1	1		22	180	23	1	2	206
Hassan	22	1		1	27	143	23	1	2	173
Shimoga	11	3		5	22	143	11	6	4	164
Kadur	11	5		18	37	327	31	3	19	369
Chitaldrug	5				5	25	4			29
Total	131	11	9	27	221	1,300	14	22	25	1,361

No. G. 18985-93 (1)—POL. 142-20-2, DATED 8TH APRIL 1921.

3. The total number of licenses issued is 255 during the year as against 221 in the previous year, showing an increase of 34 licenses. The increase in the districts of Bangalore, Kolar and Mysore, of 21, 13 and 10 licenses, respectively, is preceptible, while there has been a slight decrease in all the other districts, except Tumkur, where the number remained stationary.

4. Of the total number of licenses taken out during the year, 190 were District licences, 18 District licenses including State Forests, 22 Provincial licenses, and 25 Agricultural licenses. Of these, 116 licenses were taken out by Europeans and Eurasians and the rest by Indians during the year as against 84 and 137 respectively in the previous year. The amount of license fees realised during the year was Rs. 1,810 as against Rs. 1,885 in the previous year, thus showing an increase of Rs. 425.

5. Eight cases involving 27 persons were prosecuted during the year in the Districts of Kadur and Mysore for contravening the rules. Six cases involving 16 persons ended in conviction and the remaining 2 cases with 11 persons were pending at the close of the year in the Mysore District. It is reported that the offender in the Kadur District was Major Steevens, who was prosecuted and sentenced to a fine of Rs. 25 before Justice of the Peace Mr. Plumer.

6. The original reports received from the Districts are herewith submitted.

Statement of Dismissals.

Report of the Archæological Department.

No. G. 19385—G. M. 175-20-2, DATED 12TH APRIL 1921.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAJARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Letter No. C. 5, dated the 12th March 1921, from the Director of Archæological Researches in Mysore, forwarding the report on the working of the Mysore Archæological Department for the year ending 30th June 1920.

Order No. G. 19385—G. M. 175-20-2, dated 12th April 1921.

Recorded.

2. The Director made a short tour in the Hassan District, and in North India after attending the Poona Oriental Conference. His Assistant toured under his instructions in the Mysore District. This resulted in the discovery of 69 new records and of some artistic structures not noticed before. The number of villages visited was 94 in all.

3. *Work at Headquarters.*—The work done at headquarters is given in detail in paragraphs 41 to 57 of the report. Two sets of copper plates were examined during the year. One of them in the possession of Lakshmisena-Chat-taraka Pattacharya of the Singangadde Jain Matha, received through Mr. B. Padma-rajya Pandit of Chamrajnagar records a grant to a Jain Basti by the Ganga King Sripurusha and his son Saigotta-Sivamatha and the other a facsimile of a portion of which together with an incomplete copy, received through the same Pandit records a grant to a Jain Basti at Talkad in 807 by the Rashtrakuta Prince Kamba Deva.

Besides the two monographs on the Kesava temple at Belur and Lakshmidēvi temple at Doddagaddavalli, a monograph on the temples at Halebid is under pre-paration. The printing of the translations of the Kannada texts of the revised edition of the Sravana Belagola Volume and of the General Index of the Volumes of the Epigraphia Carnatica did not make much progress.

About 40 photographs of views of temples were sold in the Archæological Office and some 40 copies of the Belur and Doddagaddavalli monographs were sold in England.

4. Government observe that the report has been submitted very late and direct that arrangements should be made to avoid such delay in future.

K. MATTHAN,

Offg. Chief Secretary to Government.

To—The Director of Archæological Researches in Mysore.

**Administration Report of the
Public Works Department.**

No. G. 19756-8—G. M. 158-20-3, DATED 19TH APRIL 1921.

**PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.**

GENERAL AND REVENUE DEPARTMENTS

READ—

Letter No. M. 6398, dated 22nd January 1921, from the Chief Engineer of Mysore, forwarding the Administration Report of the Public Works Department for the year 1919-20.

Order No. G. 19756-8—G. M. 158-20-3, dated 19th April 1921.

Recorded with the observation that there has been a delay of nearly three months in the submission of the report which should be avoided in future.

2. Mr. Srinivasacharya Cadambi continued to control the operations of the department as Chief Engineer during the year.

3. Among the most important administrative changes during the year were the following:—

(i) A separate sanitary circle of superintendence was formed consisting of the existing Sanitary and Water-Supply Divisions with effect from the 15th August 1920, to ensure proper attention to the preparation and execution of water-supply schemes, drainage projects, etc.

(ii) The existing two circles of superintendence, *viz.*, Northern and Southern were reconstituted into Eastern and Western Circles and their jurisdiction was revised with a view to make them geographically compact and administratively efficient.

(iii) The number of sub-divisions was reduced so as to make it possible to post a gazetted officer in charge of each sub-division.

(iv) The special sub-divisions for the investigation of new irrigation projects and preparation of estimates for the restoration of existing tanks were abolished at the end of the year and the work was added on to the ordinary sub-divisions.

(v) The scale for Draftsmen was revised and the cadre treated as provincial.

4. *Total grant and outlay.*—The year's grant from all sources aggregated Rs. 50,24,539 against which an outlay of Rs. 47,82,459 was incurred. There was thus a lapse of Rs. 2,42,080. If the amount of Rs. 2,20,704, expended without grant be included, the lapse amounts to Rs. 4,62,784. This is reported to be due as usual, to scarcity of labour, slackness or failure or want of contractors, insufficiency of the sanctioned rates owing to rise in prices, etc. Government wish to re-iterate in this connection the instructions conveyed by them in the reviews of previous years about adhering strictly to the budgetted programme of works. In furnishing details for items of expenditure incurred without grant in paragraph 10 of the Report, capital and revenue accounts should have been separately shown. In regard to certain items in paragraph 12, it has been explained that there were no actual excesses under those heads but that they have been treated as such in the absence of formal appropriation. This procedure is not correct. Formal orders for the reappropriation of funds should invariably be obtained before incurring expenditure, in future.

The total expenditure of the year under report was less than that of the previous year by Rs. 2,02,341. This is said to be due to reduced expenditure under irrigation and contribution works.

5. *State Funds.*—The aggregate modified grant under this head stood at Rs. 38,30,500 against which an outlay of Rs. 37,92,047 was incurred, the net lapse being Rs. 38,453.

No. G. 19756-8—G. M. 158-20-3, DATED 19TH APRIL 1921.

6. *Irrigation*.—The total outlay incurred under this head amounted to Rs. 2,82,595 against a grant of Rs. 5,33,000, the lapse being so high as 47% which is not satisfactory. Out of fourteen works of restoration or construction of new tanks only two, *viz.*, the construction of a new tank across Vadli stream near Hairige in the Hunsur Taluk and the restoration of Melur tank in the same taluk made some progress. The work of repairing the breach of the Manchyapatna Huthekere tank in the Nagamangala Taluk was nearly completed. The other works are reported not to have made any appreciable progress owing to the failure of contractors in the majority of cases. The number of such incomplete tank works is rather large and among these may be mentioned the construction of a new tank across the Maralwadi stream near Mavathur in the Kankanhalli Taluk and another at Bavanhalli in Chiknayakanhalli Taluk and the restoration of Bolappanhallitank in the Closepet Taluk, Dadaga tank in the Nagamangala Taluk, and Aiyanakere tank in Kadur Taluk.

Among the channel works that were in progress, only two were completed. *viz.*, improving the Krishnarajakatte and the Sriramadevar South Channel in the Hassan District. The accounts of the latter were not finally closed. The construction of the anicut across the Bhruvu river did not make much progress. Some progress is reported in the construction of an anicut across the river Bhadra at Gopala in the Shimoga District. No mention is made in the report of the condition of the various channels. This should be done in future.

7. *Civil Works*.—The expenditure on buildings amounted to Rs. 9,18,983, while the grant was Rs. 7,66,500.

The most important works that were in progress were the following:—

- (1) Providing Sanitary fittings to the Public Offices at Bangalore.
- (2) An additional building for the Public Offices at Bangalore.
- (3) An additional block of buildings in the compound of the District Office, Bangalore.
- (4) New Collegiate High School at Mysore.
- (5) Subsidiary buildings to the Krishnarajendra Hospital at Mysore.
- (6) Additional wards and operation Theatre for the Civil Hospital at Chikmagalur.
- (7) New Office block to the Palace at Mysore.
- (8) Guests' Mansion near the Lalitadri Hill at Mysore.
- (9) Improvement to the Daria Dowlat Bagh at Seringapatam.

The following works were completed some time ago and accounts were finally settled during the year under review:—

1. Extension of the Revenue Survey Offices at Bangalore.
2. Public Works Stores at Bangalore.
3. Improvements to the Cubbon Park at Bangalore.

The following works were completed during the year but the accounts have not yet been closed:—

1. A Technological Institute at Bangalore.
2. Krishnarajendra Hospital at Mysore.
3. Servants' lines to the European Guests' Quarters at Mysore.
4. Improvements to the quarters for the members of the Representative Assembly.

5. Permanent buildings and temporary sheds at the Karapur Camping grounds.
6. A new High School at Hassan. The last work is almost completed except the portico in front.

8. *Communications*.—The expenditure under this head was Rs. 6,94,844 as against Rs. 7,93,302 in the year previous, out of which a sum of Rs. 1,42,418 was spent on original works, Rs. 5,47,020 on the annual maintenance and repairs of State roads and Rs. 5,406 on repairs of ferries during the current year. Government are not satisfied with the general condition of the Provincial and District Fund roads in the State.

No. G. 19756-8—G. M. 158-20-3, DATED 19TH APRIL 1921.

9. *Water-supply*.—The work of electrification of the pumping plant of the Chamarajendra Water Works at Bangalore was completed. Pipes to the value of Rs. 11,765 were purchased and kept in reserve for emergencies in cases of bursts in the main between Soldevanhalli and the Jewell Filters at Bangalore. Arrangements are being made to install an additional filter unit at the combined Jewell filters at Bangalore. The work of laying submains for water-supply in the southern half of the Basavangudi extension, as well as the high level reservoir at Malleswaram in Bangalore City was completed during the year. Fair progress was made in the laying out of a system of pipes for watering certain roads and improving the supply to high level bungalows and mansions in the Mysore City. Government observe that no progress has been reported on new works.

10. *Miscellaneous*.—Sanitary improvements and improvements to the water-supply of Shimoga town did not make much progress. There has been considerable delay in the carrying out of these works. Sanitary improvements and water-supply to Hiriur town were completed and handed over to the Municipality; but the accounts have not yet been closed. Drainage works at the Imperial Service Lancers Lines at Bangalore were also completed as well as the Lecture Halls and certain improvements to the Oriental Library attached to the University building at Mysore. The construction of the Students' Union building at Bangalore did not make much progress for want of materials. The work of improving the Ghati Subramanyaswami temple at Maklidrug in the Doddballapur Taluk was completed and the accounts were closed during the year. The amount allowed by Executive Engineers to lapse under the Irrigation Cess Fund is reported to be so high as Rs. 76,680. This is said to be due to the presence of water in tanks which did not admit of work being proceeded with. Sufficient precautionary measures should have been taken in good time to prevent such large lapses.

11. *Establishment*.—The charges on account of establishment amounted to Rs. 8,71,372 as against Rs. 8,93,186 in the year 1918-19. The proportion of establishment to the total expenditure during the year was 23.3 per cent as against 22.1 per cent in the previous. The amount contributed under tools and plant by the District Fund at the rate of 17 per cent of the capital outlay should have been indicated in the report.

12. *General*.—The block system of irrigation under the Vani Vilasa Sagara was ordered to be continued for another six years. The area cultivated under the system was 7,316 acres. Administrative sanction was accorded during the year for the improvement of water-supply to the City of Mysore at a cost of about Rs. 15 lakhs and plans and estimates are under preparation. Improvements for the water-supply system at Bangalore City and the Kolar Gold Fields are being investigated.

The question of revising the Public Works Schedule of rates has not yet been finally settled although it has been under consideration for a long time. The settlement of the question should be expedited.

There is said to have been a dearth of competent contractors during the year. The reason for this has not been explained.

It is gratifying to note that a good number of works were inspected during the year by the Superintending and the Executive Engineers and that the Chief Engineer made 91 inspections of works and travelled 3,061 miles of road. But no information has been furnished in the report as to the number of days these officers were on tour. Government regret to note that the number of office inspections by the Officers was very much short of the prescribed limit.

The question of introducing necessary reforms in the administration of the Public Works Departments and revising the establishments with the view both to economy and efficiency are engaging the active consideration of Government.

Statements of works of public utility.

No. G. O. 1029-37—Stl. 10-20-16, DATED 19TH APRIL 1921.

**PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.**

GENERAL AND REVENUE DEPARTMENTS

READ—

Statements of works of public utility constructed by private individuals during the half-year ending 31st December 1920, submitted by Deputy Commissioners of Districts in accordance with Government Order No. G. 10762-810—G. M. 360-14-1, dated 8th April 1915.

Order No G. O. 1029-37—Stl. 10-20-16, dated 19th April 1921.

Recorded.

2. The total number of works executed during the half-year was 76 of an approximate value of Rs. 46,830. The largest number, viz., 30, was constructed in the Kolar District, costing on the whole Rs. 7,250 approximately. The Bangalore District, however, ranks first in regard to the amount spent on such works, viz., Rs. 11,800 while the district of Shimoga comes last with Rs. 1,800.

3. Classifying works according to the nature of purpose, it is observed that about 55 per cent of them consisted of wells and *gokuries*, 32 per cent of temples, chattrams, rest-houses and mantaps, 5 per cent of halls and school buildings, 4 per cent of roads and repairs thereto, the rest being of a miscellaneous character.

4. The accompanying consolidated statement showing details of works constructed in all the districts will be published in the Gazette.

K. MATTHAN,
Offg Chief Secy. to Govt.

To—The Deputy Commissioners of Districts.

The Compiler, *Mysore Gazette*, for publication.

The Cotton crop.

No. 1058-67—Stl. 5-20-30, DATED 30TH APRIL 1921.

**PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.****GENERAL AND REVENUE DEPARTMENTS.****READ—**

Letter No. C. Per. 28.4, dated 18th April 1921, from the Revenue Commissioner in Mysore, forwarding revised statements of the final forecast of the Cotton crop in the Mysore State for the year 1920-21.

Order No. 1058-67—Stl. 5-20-30, dated 30th April 1921.

RECORDED—

2. The total area under cotton, during the year under report, amounted to 111,059 acres against 144,927 in 1919-20, or a decrease of 33,868 acres or nearly 23·4 per cent. This decrease has been attributed partly to the deficiency of rain in certain districts and partly to fall in prices. To some extent, cotton yielded place to food and fodder crops. The yield is estimated at 10,744 bales as against 17,408 bales in 1919-20, and is nearly 36·3 per cent below the actual yield of last year.

3. The following table shows the area and yield according to the recognised trade description of cotton.

Mysore State 1920-21	Dharwar		Coompta		Cambodia		Other sorts		Total	
	Area	Outturn	Area	Outturn	Area	Outturn	Area	Outturn	Area	Outturn
	24,810	2,296	75,015	6,886	1,041	86	10,693	1,526	111,059	10,744

(a) Area is shown in acres. (b) Outturn is shown in bales of 400lbs. each.

GENERAL AND REVENUE DEPARTMENTS

Order No. G. 19372-80—Cash 74-20-1, dated 12th April 1921.

As a large majority of the Representative Assembly members that attend the Darsana and the Birthday Sessions prefer to receive *lavajama* in cash, Government direct that the system of issuing *lavajama* in kind be stopped hereafter and that all members be paid the cash equivalent to it.

K. MATTHAN,
Offg. Chief Secy. to Govt.

To—The Deputy Commissioners of Districts for communication to the Representative Assembly Members in their districts.

The Comptroller, Mysore Government.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Government Order No. R. 9458-69—L. R. 69-20-4, dated 24th February 1921, sanctioning the budget estimates under the Irrigation Cess Fund for the year 1920-21.

2. Letter No. T. A. D. A. 1361-2, dated 12—17th March 1921, from the Comptroller to

DISTRICT.	Amount.	
	Rs.	a p.
Bangalore	86,915	1 1
Kolar	1,11,188	11 11
Tumkur	1,17,211	9 1
Mysore	1,566	10 8
Hassan	16,318	11 4
Shimoga	2,38,299	4 5
Kadur	92,690	3 3
Chitaldrug	3,913	13 8
General Irrigation Cess Fund	2,81,318	1 2

Government, stating that the marginally noted balances were available on 1st July 1920 to the credit of the several districts under the ordinary Irrigation Cess Fund and the General Irrigation Cess Fund.

Order No. R. 12110-20—L. R. 69-20-7, dated 30th April 1921.

In view of the correct balances as now intimated by the Comptroller, the budget estimates of receipts and expenditure under the Irrigation Cess Fund for 1920-21, provisionally sanctioned in the Government Order read above, will be revised as shown in the accompanying statement.

2. Of the grants from the General Irrigation Cess Fund to the Mysore and Chitaldrug Districts, sanctioned in paragraphs 8 and 9 of Government Order dated 24th February 1921, read above, the grant to the Chitaldrug District is reduced to Rs. 868-14-4 and the grant to the Mysore District is withdrawn, being unnecessary

REMARKS.—The figures in columns, 2, 3, 5, 15 and 16 are final as they are based on correct balances furnished by the Comptroller.
 * Includes Rs. 2,500 applied for on account of repairs to branch channels in the Krishnarajassagara Circle and also an extra allotment of Rs. 1,823, on account of the maintenance of river channels in Mysore District.

No. R. 11461-72—L. S. 33-20-3, DATED 14TH APRIL 1921.

**PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.**

GENERAL AND REVENUE DEPARTMENTS.

READ—

Government Order No. 6546-56-11,8 dated 6th March 1884, sanctioning the original settlement of 193 Government villages of the late Chikballapur Taluk, of the Kolar District.

2. Letter No. 122 dated November 1920, from the Superintendent, Revenue Survey and Settlements in Mysore, submitting * proposals for the revision settlement of the 193 villages above referred to.

* (Printed in extenso.)

3. Correspondence ending with letter No. 185 dated 24th January 1921, from the same officer submitting with his final remarks the opinions of the Revenue Commissioner and the Deputy Commissioner, Kolar District, in regard to the proposals contained in his letter read above.

Order No. R. 11461-72—L. S. 33-20-3, dated 14th April 1921.

The proposals relate to the revision of the assessment of 193 villages distributed as follows :—

157 villages in Chikballapur Taluk.
26 villages in Devanhalli Taluk.
8 villages in Goribidnur Taluk.
2 villages in Dodballapur Taluk.

2. The tract covers an area of 1,53,236 acres and is fairly level in the south and the centre, the other portions being hilly and covered with forests in some parts, with the Nandi hills to the west. The climate is good and the average rainfall is 30·99 inches per annum.

3. The North Pinakini with its feeders flows through the tract. There are 28 major and 80 minor tanks, 27 and 22 respectively of which have been restored. There are in addition numerous wells and "Talapariges" affording a good water supply.

4. The staple dry crops of the region are Ragi, Horse-gram, Avare, Togari, Groundnuts, etc. Paddy is the principal wet crop. Sugar-cane is largely grown in the tract, both as a wet and garden crop.

5. At the period of the original settlement, the population of the tract which had been decimated by the great famine of 1878, was only 43,439 (in 1881). During the next decade (ending with 1891) it increased appreciably by 10,000 and the increase was kept up during the next two decades also, the population being 58,396 at the Census of 1911.

6. During the currency of the present settlement, the means of communication in the tract which were already fairly good, have been further improved and the Light Railway from Bowringpet to Bangalore through Kolar has been opened. Important additions have also been made to the roads in the interior.

7. Since the original settlement, the agricultural and other resources of the people have considerably improved as noted below :—

	Increase (Per Cent.)
Houses	68
Cattle	1·5
Carts	58

No. R. 11461-72—L. S. 33-20-3, DATED 14TH APRIL 1921.

The prices of all the principal food grains grown in the Taluk have risen by over 50 per cent. The value of land has also increased correspondingly. The revenue history of the tract has been very satisfactory, bearing ample testimony to the favourable nature of the rates fixed during the current settlement.

8. The Survey Superintendent, proposes to revise the existing rates as shown below :—

Land	Maximum		Average	
	Original	Revised	Original	Revised
Dry I ...	2 12 0	3 1 6	1 11 5	1 14 0
II ...	2 8 0	2 13 0	1 6 10	1 9 9
Wet I ...	9 0 0	9 0 0	6 3 7	6 4 1
II ...	9 0 0	9 0 0	6 3 0	6 4 9
Garden I ...	16 0 0	12 0 0	5 10 3	5 7 3
II ...	16 0 0	12 0 0	5 14 0	5 3 8
General ...	...	...	2 11 4	2 14 3

The above proposals involve an increase of Re. 0-2-11 in the general average rate per acre and are estimated to result in an increase of revenue by Rs. 8,744 or 6·7 per cent.

9. The revised rates proposed by the Survey Superintendent were duly notified in the villages concerned, but no objections thereto were received from the raiyats. The Revenue Commissioner and the Deputy Commissioner, Kolar District, also agree to the said rates as they are very moderate. The only point objected to by the Revenue Commissioner is the recovery of the Irrigation cess as a separate levy. The same question was raised in connection with the resettlement of the Koppa Taluk and Government have already directed in para 10 of their order No. R. 10265-77—L. S. 17-17—17, dated 13th April 1918, that the irrigation cess should continue to be recovered separately, pending orders on the general question under consideration.

10. The revised rates proposed by the Survey Superintendent as detailed in para 8 *supra*, are accordingly sanctioned in their entirety. They will be announced as soon as possible and brought into effect from the year 1921-22, with the usual guarantee of 30 years.

B. RAMASWAMIYA,

Secy. to Govt., Rev. Dept.

PRESS TABLE

Expd.—M. A.

No. R. 11461-72—L. S. 33-20-3, DATED 14TH APRIL 1921.

FROM

D. K. DARASHAH, Esq., B.A.,
*Superintendent of Revenue Survey
 and Settlements in Mysore.*

TO

B. RAMASWAMAIYA, Esq., B.A., B.L.,
*Secretary to the Government of His Highness
 the Maharaja of Mysore,
 Revenue Department.*

SIR,

I have the honor to submit the following proposals for the revision of assessment in 193 Government villages of the Chikballapur Taluk of the Kolar District as it stood at the Original Survey Settlement, and sanctioned in Government Order No. 6546-56—118, dated 6th March 1884. The number of villages at that time was 281, inclusive of the Nandi State Forest which was treated as a distinct village ; but subsequent mutations have reduced it to 193, amalgamation having been effected in the case of 92 villages, and 4 villages having been added. Of these four, three were old Inams brought over to the head of Government villages ; the fourth is a kaval cut out of the extensive lands comprised in one of the old villages.

2. The tract under report is now distributed as follows :—

Chikballapur Taluk		..	157 villages
Devanhalli	”	..	26 ”
Goribidnur	”	..	8 ”
Dodballapur	”	..	2 ”

3. The Devanhalli and Dodballapur Taluks of the Bangalore District adjoin at the south of the tract, while west, north, and east it is bounded by the Goribidnur, Gudibanda and Siddlaghatta Taluks, all of the Kolar District. A map accompanies this report which explains its situation exactly.

4. The gross area of the taluk by the old survey was 1,52,481 acres, that by re-survey is 1,53,236 ; the correspondence between the two is a close one, the difference of 755 acres being only 20 guntas for every hundred acres, or roundly $\frac{1}{2}$ per cent. The space taken up by the hill range on the west side accounts chiefly for so large a proportion as 142 out of a total of 239 square miles being booked as uncultivable.

5. The tract is fairly level in the south and the centre, the spacious valleys rising gently into wide stretches of level land, several of which are many square miles in extent. But past Purnasagar, which is about midway on the road from Chikballapur to Peresandra in the north, the surface becomes rocky, rugged and bare, the undulations are abrupt and steep, and cultivation is not continuous, excepting in the long but narrow valleys which mark the course of the larger streams. A well defined ridge running east and west about 5 miles to the north of Chikballapur, marks the watershed which divides the basins of the North and the South Pinakini rivers.

6. The Nandidrug hills range along the west of the taluk ; they are a section of a long chain running up to Penukonda in the Ananthapur District, and are included in the two State Forests known as Nandi and Narasimhadevarbetta. The jungle covering the sides is throughout of a scrubby kind ; but these hills, relatively uninviting as they are from the Forester's point of view, are of considerable benefit in other ways, for, they are primarily the cause of keeping the adjoining grounds moist, making it easy thereby to do profitable gardening during the dry weather ; they help also to form a great many surface springs, and keep doling out to several streams in a moderate but continuous measure for several months after the rains cease. Cattle when pressed for fodder can have sufficient grazing on the hill-sides, and the people may for a small fee cut and sell fuel at remunerative prices at any time. The most important of the hills is Nandi, 1,800 feet above the surrounding country, and 4,851 feet above the sea. A number of very fine bungalows, an excellent reservoir fed by perennial springs, and an efficient establishment to serve the convenience of

visitors, added to the salubrity of the climate, make the place eagerly sought for during the hot weather by well-to-do people from all parts of the country. Nandi in particular had attracted attention, not merely as a resort of health and pleasure (the old name under the Ganga Rulers was Nandagiri or Anandagiri), but quite decidedly for its merits from a military point of view—the remains of a once well equipped fortress around the plateau on the top, go to prove that it was looked upon as no small item of national importance, from ancient times up to those of Tippu Sultan. Other peaks in the range are Chennakeshavabetta 4,762 feet, Kalayardurga 4,749 feet and Brahmagiri 4,657 feet. The Harihareshwarabetta with its peculiar two headed top stands detached a little to the east.

7. A certain diversity in conditions is noticeable between the two portions of the taluk lying on either side of the hills. On the west side the general quality of the soil appears to me to be superior to that on the east, it being in the irrigated valleys very dark and loamy, and elsewhere, more red in colour and less sandy; the palms of the usual kinds (the cocoanut, the areca and the wild date), as also the common margosa, which are all in evidence in the west are conspicuous by their absence on the other side. Even the jungle on the west slopes of the hills is distinctly better in growth and colour. The *kapile* here displaces the *yata* in universal use on the east.

8. The Nandi Range is the starting point of several useful streams. The North Pinakini rises on the west and does a great deal of irrigation, much of which lies in the adjoining taluks of the Kolar District; and in the British territory beyond. The Papaghni and the Chitravathi also rising in the hills, take a north-easterly course and serve as feeders to the North Pinakini river which they join long after they leave Chikballapur Taluk. The large tanks at Purnasagar and Raddihalli are helped by these streams. The South Pinakini and the Arkavati with their sources, one on the east and the other on the west, flow southward through the Bangalore District. The Kandavara, the Gopalakrishnakere, and farther south the Tatmachtenhalli, all within the tract in question, are large reservoirs formed by the head waters of the South Pinakini.

9. Besides the two State Forests under which the whole of the hill range has been brought, the Forest Department has the care of a few plantations, the most important of which is that of Kamashettihalli, which takes up about 6 square miles and in which sandal is assiduously reared along with other timber like the *balige*, the *dindiga*, the *hunise* and the *bellari*. The raiyats are of opinion that the absorption by this plantation of subsoil moisture is so great, that the well gardens in the villages round about it have sensibly deteriorated. Much the larger part of the growth in the State Forests consists of fuel plants, among which are found clumps of bamboo, and some *pulugu*, *chennangi* and other kinds of usual trees.

10. The average quality of the soil in a considerable portion of the north of the taluk is inferior. This remark does not apply to the beds of irrigated valleys, for these are of a high order everywhere; but much of the *khushki* in about 15 villages in the north is sandy and friable; so that, with a shortage of manure in addition, the returns on dry cultivation are not so good as they are in the rest of the taluk. The classification of these lands, and consequently the assessment, is of course in keeping with these conditions. Southwards, the soils improve, and in the large valleys in the neighbourhood of Chikballapur and Nandi, and of Manchenahalli in the west, they are extremely good for the kinds of cultivation practised.

11. The drainage of the taluk has been intercepted by bunds at nearly every convenient spot. There are in all 108 tanks of which 28 are major, all but one of which have been restored; of the 80 minor tanks 22 have been restored, and 58 remain to be dealt with. A statement furnished by the Public Works Department shows that they have spent Rs. 1,36,179 over repairs within about 30 years, but the latest year to which it refers is 1911-12. The figure is therefore exclusive of what has been spent since that year, and of the sum of Rs. 1,50,706 spent on the Srinivasasagara tank constructed subsequently to the Survey Settlement. It leaves out also money that may have been spent on some of the minor tanks independently by the Revenue Department, details of which are now difficult to get at.

12. Among the more noteworthy of the tanks in Government villages are those of Kandavar, Gopalakrishnakere, and Tatmachanahalli, all of a series, and lying beside the Chikballapur-Devanahalli road, the Mavu Amanikere and Manchanabele

No. R. 14461-72—L. S. 33-20-3. DATED 14TH APRIL 1921.

in another series a little to the north of the Kasba and the tanks at Purnasagara, Peresandra and Raddihalli. The large newly constructed tank at Ramasagara immediately beyond the borders of the taluk irrigates numerous villages, only one of which comes within Chikballapur Taluk. The Srinivasasagara also recently constructed, is formed by the first of the bunds thrown across the North Pinakini, and irrigates a large atchkat of nearly 700 acres. The Manchenahalli tank in the extreme west is another important source of irrigation. These tanks without exception look to the hills for their water-supply.

13. The complaint about tanks getting choked up is inevitable here as it is elsewhere. Naturally the tanks nearer to the hills are more rapidly filling with silt, the rush of the waters down the slopes bearing it down more effectively than when the drainage becomes placid on level ground. The fine tank at Dolmarali same distance to the east of Nandi, is one among several tanks that have got badly incapacitated on this account. A still more striking example is that of the Srinivasasagara, not quite 30 years old yet, which has already silted to a depth of 14 feet, on account of the vicinity of the hills and the cultivation crowding all round the bed. The tank at Manchenahalli has a deposit of so much as 33 feet of silt. A palliative has been found for a tank here and another there, under which the lost capacity is partially restored by raising the level of the waste weir. But that expedient cannot stand good for all silted tanks; it is obvious too that a mere raising of the koli wall is not a remedy that can be applied to any tank beyond a certain limit, without positively courting a breach in the bund.

14. My impression on the whole is, that the condition of the tanks so far as the state of the bunds and the sluices is concerned is fairly good, and that the efforts made for restoration and repair have been successful so far as they go. But the tremendous evil of silting remains untouched, and it appears to me to be only a question of some more years, for the people to realise that the only adequate and practical solution lies in their manfully shouldering the patriotic duty of sacrificing a few days of labour every year to the all important purpose of general restoration. One can very well foresee that the difficulties of devising good arrangements on such a venture, will be as serious as they will be varied; but we may depend on the high talents for organisation we have in the country, both within and outside of official circles, to overcome them. The consent to give labour free or the power to compel it, is the point we should first make sure about; for, no amount of money that Government can ever spare will make a headway good enough to arrest the evil before it gets too late. It was the united labour of the people that created the tanks, and there appears to be no other power strong enough to restore them fully to life. Government may, as an earnest, cease to collect, not only the irrigation cess but also such other portion of the land revenue proper, as the people can prove to be justly expendable in behalf of the tanks. Every household in the State should contribute either its appointed share of personal labour, or of the money required to produce such labour,—not even the officers of Government owning no land should be exempt, for it is not difficult to show that it would be impossible to live and move about in the country as they do, if the tanks, were extinct.

15. Channels are made to lead off water from most of the streams taking their rise in the hills, but almost all the land so irrigated lies outside of Chikballapur Taluk. The North Pinakini alone supplies water to a pretty extensive atchkat in 5 Government villages and two Inam villages in the taluk. A much smaller area is irrigated by means of channels from the Chitravathi.

16. Mention has already been made of *talapariges* or springs welling up to the surface. The water either flows directly to the lands under them, or has to be lifted by small *yatas*, or thrown up by means of the basket, *goode*, where the levels are unfavourable. Springs are easily tapped in the beds of streams and turned to use.

17. The hill range is of incalculable value to the wells in the valleys, where one may notice scores of them within a few yards of one another. It is believed also that the composition of the subsoil which generally prevents the water from disappearing very low, helps to keep it up in the wells at easy depths till about the middle of the hot season. Such is conspicuously the case in the Nandi valley; the villages of Nandi, Sultanpet, Kuphalli, Sringarakadarahalli and Bharmanahalli are examples. At the annual *jatra* at Nandi in February 1919 which followed

on a bad monsoon, a few mudholes brought up water sufficient for 20,000 cattle and a large concourse of people for a week. At Nandi a small mudhole in a back-yard may be dug on an emergency, and the water lifted by hand in pots for domestic use. The wells are all of the *yata* class, excepting in the villages on the Goribidnur border, where the *kapile* comes into use. Several of them are completely riveted with stone, but a commoner grade consists of a shaft driven in and riveted only under the *yata*. Where the water is close to the surface, and not much of it is required at a time, a *kunta yata* is used, worked by the foot, like the bellows in a smithy. Where the level is very low the bucket is moved with the help of a person treading up and down the cross beam, so as to work it see-saw; this is called the *thuli yata*. Where the depth is moderate, as in the majority of the cases it is the usual *kai yata* method is adopted, the man working the bucket with the hands alone.

18. The climate, from the point of view of public health is as good as it is anywhere else in the State. The raiyats of the Kasba and Nandi Hoblis strike me as being particularly active of habits. The average rainfall in the tract for 46 years was 30.99 inches, the highest in any taluk of the Kolar District (page 5 of the latest published Rainfall Report). The distribution is about even in the centre and the south, the rain gauge at Nandi showing an advance of less than an inch on that at Chikballapur; but there are good grounds to think that if a rain gauge had been stationed at or near Peresandra, it would have proved that a block of the villages in the north shade off into the less favoured regions lying about Bagepalli where the average is found to be no more than 22½ inches. The monthly averages given on page 7 show that, like the rest of the district, Chikballapur is much indebted to the north-east monsoon; it derives nearly a half of its annual supply in the months of September onwards. While the earlier monsoon yields progressively from about 1½ inches in April, to 4½ inches in August, doing what is wanted to improve the weather, to soften the ground for the plough and the seed, and to nourish the young monsoon crop, the later rains it is that fills the tanks and the springs, which are turned to so much account in the dry season.

19. If anything below 25 inches be regarded as an unsatisfactory fall for a year, we shall find six of such in the course of the 16 years ending with 1918. One of these was positively bad, with a total of less than 20 inches. (Page 27 of the Rainfall Report.)

20. The staple dry crop is *ragi*; *hurali*, *avare*, *togari*, *nelagadale*, *save* and *utshellu* come next in importance. *Ragi* is sown in rows, a line of *avare* or other subsidiary intervening between every 12 of *ragi*. An acre, which takes 12 seers of *ragi*-seed and four of *avare*, usually produces in a propitious year, an average of 6 pallas of *ragi* and 80 seers of *avare*. *Ragi* is occasionally raised as a *thadi* crop. the peculiarity in this is that the crop can be raised in the driest of seasons if only 3 waterings could be had from a tank or a well, and harvested in much quicker time than is required by the ordinary crop. The seedling is transplanted when 20 days old, and the harvest is ready in three months. Less seed is required under this method, at the same time the harvest is not so full as that of the regular monsoon crop. In parts of the Peresandra hobli, the available manure is nearly all used up for the rice fields and the gardens, so that very little is left for the dry lands, which moreover, are not of a high order of fertility. Consequently a frequent mode of getting something out of them is to scratch the surface and to sow it with *hurali* or *save*, which are least expensive, least troublesome to sow and to watch, and require very little of rain; the profits are correspondingly small. Among the minor uses to which *khushki* and some inferior *tari* lands are put, may be mentioned the rearing of casuarina topes, though I have never seen any of a considerable area. The drawback is that it involves waiting for a long time for the reward of guarding the young plants for the first few years against enemies like the goat. Once a tope is about 12 years old, buyers are ready to pay something like 500 rupees and more for the trees on every acre.

21. The chief crop taken from wet land is rice, alternating frequently with sugarcane. The commonest variety is the *dodbaire*, a somewhat coarse and reddish grain, but sweeter and more nutritive than the finer rices, of which several varieties are grown under the more important of the major tanks. The better cultivated of the rice lands take 48 seers of seed-paddy to the acre, and produce something over 9

No. R. 11461-72—L. S. 33-20 3, DATED 14TH APRIL 1921.

allas of cleaned rice on the average ; the less productive *punaji* requires no more than 30 seers of seed, but gives a proportionately low return. Careful inquiries coupled with an experiment, lead me to say that the average gross outturn on rice-fields is about 19 times the seed sown, and ten times the average assessment, reckoning six seers of rice to the rupee. Two crops are taken from portions of the atchkats of the Srinivasasagara, Manchenahalli, Kandavar, Gopalakrishnakere, Katriguppe, Manchanbele and Peresandra tanks.

22. The raiyats are keen on growing sugar-cane wherever they find it convenient to do so ; small bright patches of the cultivation are to be noticed in nearly every village in the centre and the south ; I have met with continuous stretches of them only under the Srinivasasagara, Gopalakrishnakere and Katriguppe tanks. Allowing most liberally in money for every conceivable item in the cultivation of the sugar-cane, the net profits per acre which admittedly produces a standard outturn of 100 maunds are, according to the raiyat's own calculations, over 150 rupees, which is about 20 times the assessment. The cane is not so good as the more juicy kind that the soils of Doddballapur Taluk are capable of turning out.

23. Sugar-cane however is more often the produce of the *gardens* of the taluk, which are commonly found skirting either a tankbed, an *atchkat* or a stream. Cane, mulberry and potatoes are the chief produce of the gardens. The secret of these gardens lies in the regular if moderate waterings, and the good situation for drainage, unlike rice which requires standing in depths of water for months on end. The silk industry recently revived has given mulberry cultivation a strong stimulus. Potato cultivation also is very common because it pays so well. The heavy cost at which municipal house-manure is purchased, and good potato seed, and the labour required for watering and watching, tax the raiyat much ; but these difficulties are boldly faced on account of the assured reward, while the turnover has never been anything but good the inflated prices of the past year resulted in profits far beyond the raiyat's expectations.

24. I give below the distribution in area of the more important of the articles of produce. Out of every 100 acres cultivated in the year 1917-18,

Ragi	took up 58'35 acres	Sugar-cane	... 3'61 acres
Rice	... 11'09 "	Other garden produce...	2'85 "
Other cereals	... 13'63 "		

The area so occupied totals 89'53 acres ; the remainder, 10'47 acres, was cultivated with miscellaneous crops like oil-seed, tobacco, groundnut and condiments.

25. Ragi the daily food, naturally takes the lead, but a percentage of 3'61 for sugar-cane, or of 2'85 for "other garden produce," small as it may look, is by no means to be despised, considering that the cultivated area in the year aggregates 40,287 acres, and that sugar-cane, potato and mulberry-leaf are, area for area or bulk for bulk, immensely more powerful in the production of wealth.

26. The Great Famine of 1876-78 had taken something like 16,000 lives prior to the year of the Original Settlement. The progress made in population since then is shown below :—

Year	Population	year	Population
1881	... 43,439	1901	... 57,695
1891	... 53,767	1911	... 58,336

The increase is most marked during the decade immediately succeeding the famine, a circumstance constantly encountered by those who have to do with the counting of population,—reproductive powers in all animals appear to become most assertive during the first spurt of plenty following upon privation. The progress during the last decade is by no means good ; and it is remarkable that that should be so in a taluk in which health conditions, apart from the disturbances usually created by epidemics, are excellent. The following extract from the latest Census Report is quoted as giving some clue to the causes—

"Of the 11 towns in the District (Kolar) excluding Kolar Gold Fields, 8 towns show an increase of population. The decrease of population in Kolar and Mulbagal is due to the prevalence of Plague in them and their partial evacuation on the date of the Census. Although Chikballapur shows a large increase of population during the decennium, it has not yet regained the population which it had in 1891, and of which it lost nearly half in 1901 owing to the Plague."

No. R. 11461-72—L. S. 33-20-3, DATED 14TH APRIL 1921.

The action of epidemics may to some degree account for the very small increase, amounting to almost a pause, in the progress of the population during the decade 1901-11. But we cannot say that it accounts for it *wholly*, and yet it is difficult to speak with courage as to what else could have happened. One is however so impressed with the general movement and venturesomeness among the people here, that it would be excusable to risk the statement that there may have been fairly large number of temporary absentees on the Census day, of people connected with trade and other forms of lucrative employment.

27. The density of population at the census of 1911 works out to 244 per square mile; this however can convey no true idea, because of the immense area covered by the uninhabited hills. The density on arable land which is 97 square miles in extent is 602 while that on occupied land (in which term I include for the present purpose 8,276 acres of minor Inam land, but exclude, of course, whole Inam villages) is 768,—which, it must be owned, represents a considerable pressure on agricultural land, and which taken in conjunction with the fact that there are only 13,306 acres in all the taluk, of poor land left unoccupied, lends an additional support to the theory of temporary migration suggested in the preceding para:

28. The Census Report gives some analytical details which are worth quoting. Though these relate to the Chikballpur Taluk as constituted at the present time, there is no reason to doubt that they are about equally well representative of the old taluk of that name which took in practically as much of homogeneous territory from neighbouring tracts on one side, as it excluded to others on another. Thus, the Hindus and Mahomedans, the principal elements, numbered 53,252 and 2,615 respectively. The literates were 52 to the thousand, the ratio being 2,671 males to 294 of the other sex. Actual workers were 14,164 and dependents 42,594, making 4 dependents to each worker. The term "dependents" would, I dare say, include the woman of the house, and also such of the children as could be of help to the bread-winner. The total of 14,164 workers is distributed among 11 heads of occupation, the principal of which are—

1. Agriculture	...	...	8,953
2. Domestic Service...	...	...	1,862
3. Industries	...	...	1,078
4. Trade	...	...	1,004
5. Public force and Public administration	...	...	579

All this was about 10 years ago; the forthcoming census is likely to give us interesting accounts of the bearing that the Railway Extension, the war, high prices, profiteering and the beneficent control of affairs by Government, have had on the lives of the people during the past decade.

29. A marked improvement has occurred in the general resources of the people as the comparative statement given below will show :—

Items				At Original Settlement	As per survey	Increase or Decrease + or -	Remarks
Houses	{ Tiled	...	...	77	212	+ 135	
	{ Mud-roofed	...	...	3,316	6,616	+ 3,300	
	{ Thatched	...	...	3,752	5,170	+ 1,418	
Total				7,145	11,998	+ 4,853	
Horned cattle				56,047	56,834	+ 787	
Carts	{ Large	...	...	342	595	+ 253	
	{ Small	...	...	1,087	1,566	+ 479	
Total				1,429	2,161	+ 732	
Ploughs				4,218	6,665	+ 2,447	
Wells used for irrigation				...	2,469	...	
Others				...	461	...	
Total				...	2,9302	...	

No. R. 11461-72—L. S. 33-20-3, DATED 14TH APRIL 1921.

The increase in mud-roofed houses and the advance made generally under all the other heads, point to an accumulation of agricultural wealth. Horned cattle also have increased, though, in a progressive tract it is usual to find them diminishing, for the simple reason that expanding agriculture encroaching on grazing grounds results in the elimination of the less useful of the animals; but the available gomal, and the vast area in reserve on the hills which may come to the rescue during a fodder famine, allow of the number being kept up. There is no doubt, however, that the general quality of the animals has improved. The raiyats are specially keen on possessing good bullocks. The purchase of good bullocks for oneself has naturally evolved the idea and the habit of purchasing and selling them to others at a profit. One may scarcely pass along a village of moderate size in the months of January, February and March, without noticing one or more pairs of fine bulls recently taken at one of the cattle fairs, being fondled and trained to the new environments, and fed with *avare* stalk or other battenning stuff. The increase of 732 in the number of carts is significant of the growing trade. There are no less than 2,469 wells used for the lands they can command; the number of ploughs has gone up by 2,447 since the original settlement.

30. Never badly off for communications, the taluk has been singularly fortunate in this respect after the old settlement took place; for, not only has the Mysore-Poona Railway been opened since then, but a light Railway has been made to link it on the one side to the former, and on the other to Bowringpet on the Madras Railway, thus bringing many very important places within easy reach. The old highways within the taluk consisted of the Bangalore-Bellary road going north and south, with branches east and west from Chikballapur leading to Sidlaghatta and Goribidnur respectively. Two roads east and west from Nandi communicated with Kolar and Doddballapur, and another joined Peresandra to Goribidnur. All these are still in use. Recent additions are, a cross cut from Peresandra to Sadali on the Chintamani-Bagepalli line, and another from Nandi working round the south of the hill to join the road to Doddballapur at Heggadihalli, which dispenses with the difficulties of the Basavana-kavve on the older road. The Ghat pass on the Goribidnur road also is a trying one for a length of about a mile and a quarter.

31. Weekly fairs of the usual sort are held at 6 places within the tract; the business done at Chikballapur is considerable, its chief feature being the cattle bought and sold for about 7 months in the year, the droppings alone fetching the municipality a price of Rs. 300 per annum; the fairs at Peresandra and Manchenhalli are also important, while those of Dibbur, Sultanpet and Mudgurki merely serve the convenience of a small circle of villages around each. Bangalore, however, which is reached in a few hours either by road or by rail, is the chief market resorted to by the people. The annual fair at Nandi is one of much importance where, about 20,000 cattle and a large number of people come together unless a gathering is prohibited on grounds of public health.

32. Among industries independent of agriculture, are to be noticed the weaving of high class silk fabrics in Manchanbele and Kandavar villages, an iron foundry at the Kasba, supplying mills for pressing the juice from sugar-cane, two factories turning out tiles of Mangalore pattern, neither of which appears to be doing well and a tannery at Tippenhalli. The number of cane-mills in the taluk is 432, and of oil mills 62; there are 264 wool and cotton looms, and 36 goldsmith shops. All told, however, no great importance is to be attached to these pursuits. Agriculture apart, trade and common labour, which latter is everywhere received on good terms, are the two main lines of occupation.

33. Statistics furnished by the Registration Department relating to sale and mortgage in every 5th year since the time of the original settlement, prove that the price of agricultural land was 30 times, and mortgage-money 22 times, the survey assessment. There is no doubt that land has risen greatly in the estimation of the people.

34. No very detailed exposition can be required on the subject of prices of the produce of land, and the course they have taken within the past 35 years. Five-yearly averages for the principal articles are given in the table below. Inasmuch, however, as the object of this report is to settle assessments that must be considered as unalterable for a long time to come, it is necessary to be sure that estimates of this kind err, if anything, in favour of the raiyat. Prices since the year 1916 have

No. R. 11461-72—L. S. 33-20-3, DATED 14TH APRIL, 1921.

mounted very high, and there are no signs at present of a backward movement, but it would be quite unsafe to say that the combination of causes that have served to inflate them will continue to operate unhindered for a long time to come. Having discussed this matter with several of the intelligent raiyats in the taluk, I am inclined to agree with them when they say that it would be proper to hold that prices generally will not fall below the levels they reached in the year 1914-15, when conditions were all normal, and the great war which had just then commenced, had yet borne no palpable influence on them. Comparing then, the average of the prices prevalent during the first quinquennium after the settlement, with those of the year 1914-15, we find that ragi has risen by 131.25 per cent, rice (1st sort) by 140.00 per cent, rice (2nd sort) by 100.00 per cent, horse gram by 127.27 per cent and jaggory by 122.22 per cent. Materials are not available for a comparison in the case of the other important articles such as mulberry and potato; but I am sure nobody would ever deny, as the result of actual experience, that these things have become considerably more expensive to buyers than they were to the previous generation:—

Quinquennium	Average seers per rupee				Average rate per maund
	Ragi	Rice, 1st sort	Rice, 2nd sort	Horsegram	Jaggory
1	2	3	4	5	6
1883-84 to 1887-88	37	12	13	25	1-2-0
1888-89 to 1892-93	31	9	10	19	1-6-5
1893-94 to 1897-98	30	9	10	18	1-5-0
1898-99 to 1902-03	20	8	9	17	1-9-7
1903-04 to 1907-08	20	7	8	12	1-12-10
1908-09 to 1913-14	13	5	7	11	1-14-0
(6 years)	...	...	...	...	...
1914-15	16	5	6½	11	2-8-0
Percentage of increases in prices in the year 1914-15 over the 1st quinquennium averages.	131.25	140.00	100.00	127.27	122.22
1915-16 to 1918-19 (4 years)	14	5	6	10	2-6-0
Percentage of increases in the averages of the last 4 years over the averages of the 1st quinquennium.	164.28	140.00	116.66	150.00	111.11

35. In Appendix (A) is given the history of cultivation, collections and remissions in the past; but details from the year of the settlement up to the year 1893-94 are not forthcoming in the taluk offices. In the following table are given five-year averages of the figures in the appendix. Fluctuations of a trivial nature are observable here and there, but there is nothing peculiar about them that I can see, as necessitating comment. Contrasting the earliest quinquennium in the excerpt below with the latest, progress is plainly read in the figures both of occupied area and payments. A very striking proof of the thoughtful lines on which the old settlement was laid out is so to be found in the circumstance that very little indeed has had to be written off on account of poverty among the raiyats. The Amildar states that all the items in column 10, with the exception of the last one of Rs. 5 granted for failure of crop, relate entirely to remissions given under the rules framed for private enterprise tanks.

No. 11461-72—L. S. 33-20-3, DATED 14TH APRIL 1921.

36. The following statement shows the area of the whole of the taluk under every head, both by old survey and by revised survey :—

Description of land	Former Survey acres	Present Survey acres	Difference + or --
Arable dry crop land	51,220	49,937	-1,283
Rice or wet land	9,479	8,026	-1,453
Garden land	2,126	4,209	+1,783
Unarable land	89,356	91,064	+1,708
Total	1,52,481	1,53,236	+ 755

The dry and wet areas taken together are reduced by 2,736 acres, an occurrence explained by the figures for garden and unarable lands. Garden cultivation alone has expanded by no less than 1,783 acres, all of which must have been appropriated from dry and wet land. The increase under "unarable" is due to the conversion of assessed land into *Kharab*, for the necessary margins on the sides of roads, large channels, and tank bunds, for the extensions of village sites, for erosion by streams, and all other of such items brought to book for the first time at Resurvey. How much land of each class was appropriated under each head cannot be stated with exactitude.

No. 11461-72—L. S. 33-20-3, DATED 14TH APRIL 1921.

37. The villages in the tract were divided in two groups at the original settlement, 44 of them having been placed in a lower group on account of a relative lack of communications, and 236 villages in the first group. This distinction applied only to dry land assessment; the maxima for the wet and garden lands were the same for both the groups.

38. For the purpose of revision in the case of this taluk, I think we need not retain the principle of grouping. Alterations in the rates may follow a different plan.

39. The old dry land maxima for the two groups were Rs. 2-12-0 and Rs. 2-8-0 respectively. I now propose that an enhancement of 2 annas be levied for every rupee of the assessment under the existing rates. Among the advantages of adopting this method is the important one of furnishing the clearest idea at once to the raiyat, of the effects of the settlement on his dry land; for, an announcement of a change in the maximum, or of the average rate on his village, conveys no idea to him as to what is proposed with regard to his field individually. The assessment under this method will be worked out to the nearest anna for rounding. This system has been recently employed at revisions in the Bombay Presidency, and is reported to be working well there. It is so easy to understand, that I do not anticipate anybody will entertain a doubt upon it.

40. The enhancement of 2 annas per rupee is equivalent to one of $12\frac{1}{2}$ per cent, which, in my opinion should not be exceeded, because the existing average on the acre is as high as Rs. 1-11-0. Increasing the demand by $12\frac{1}{2}$ per cent as proposed, would be equivalent, according to the method hitherto in vogue, to raising the old maxima of Rs. 2-12-0 and Rs. 2-8-0, to Rs. 3-1-6 and Rs. 2-13-0 respectively for the two groups.

41. It is only as regards the *Khushki* assessment, however, that the simple expedient of raising the existing rate by a percentage, is possible. Soil value and distance from village site are the two factors that determine the assessment on dry fields falling under a common maximum. These factors as recorded at original operations are not interfered with at Revisions excepting in the rare instances in which clerical errors have to be mended. In this case, therefore, the alteration of an existing rate by adding or deducting a mere percentage is wholly unobjectionable. But the wet and garden assessments, though partly determined on the basis of soil, are equally or more dependent on another factor, the fickle water-supply; since the water-supply changes for better or worse in the course of time, a reclassification of it is necessitated, which produces results very frequently at variance with those obtained 30 or 40 years ago. Hence, the making of a uniform increase or decrease in the assessments would produce inequalities that the raiyat will undoubtedly resist in cases in which they go against him. The old method of dealing with the maxima has therefore to be continued for irrigated lands.

42. On a careful examination of the wet rates of Chikbailapur Taluk, I consider that they should not be enhanced, in spite of several good reasons that may be quoted to justify an increase. It is true that the standard of the tanks is a good one; that money has been spent pretty freely in keeping the bunds and sluices in good order, and that prices of produce have risen very high. On the other hand, the average rate on the acre is already Rs. 6-3-7, a high average for any taluk in which there is little or no irrigation from unfailing sources like rivers; our assessments are for all practical purposes permanent in character, that is, not ordinarily admitting of relief being given in an unfavourable season; the gradual reduction in the capacity of the tanks through silting is also to be counted, for which the good condition of the bunds and sluices alone cannot make amends. Again, the cultivation of these wet lands is often dependent on labour that is paid for, and labour has become very expensive in the taluk. Lastly, though prices may not revert to the very low pitch of 20 or even 10 years ago, it is not improbable they will move back to a certain extent from the abnormal heights they have reached within the past two years. All these things balanced together, I am led to propose that the existing maximum rate (Rs. 9-0-0) be continued for the next term of settlement. This cannot mean that every "wet" field will retain its existing assessment. The assessment on fields will be enhanced or reduced according as the water-supply may have improved or deteriorated; the old rate will continue only where the water class remains the same.

No. 11461-72—L. S. 33-20-3 DATED 14TH APRIL 1921.

43. I give below the average wet rates in the taluks hitherto revised in the neighbourhood of the tract in question. These are enjoying the benefits of a lenient treatment meted out at a time when rice, jaggery and other wet land products did not command the prices now obtained for them; still, it will be recognised that the Chikballapur rate as it is, is very markedly in advance of that prevailing in any of the others.—

Taluks				Average wet rate	
				Rs. a p.	
1	Late Gudibanda	...	...	5 2 4	Revised
2	Goribidnur	...	...	5 5 3	(Revision proposals are pending sanction)
3.	Tumkur	...	...	4 3 1	Revised
4.	Maddur	...	...	4 13 9	"
5.	Bangalore	...	...	4 13 7	"
6	Arsikere (Late Harnahalli)	...	...	4 5 4	"
7.	Nelamangala	...	...	4 11 8	"
8	Chikballapur	...	...	6 3 7	Original
				6 4 1	Now proposed

44. The old garden maximum of Rs. 16 will be brought down to Rs. 12. As a matter of fact however I have never had to reach this figure, as there is very little of the perennial class of cultivation (*dhruvapairu*), beyond a few acres in each of half a dozen villages on the Goribidnur border, which, though situated under very reliable reservoirs such as those of Srinivasasagara and Manchenahalli, are none of them in that excellent condition in which the more conscientious and diligent garden owner of the past generation would have preserved them. The well gardens for which a maximum of Rs. 6 was adopted at original settlement will be treated under the rules now in force governing their mode of assessment. An analysis of the treatment given to the gardens is explained in the table given below —

Class	Description	At Original settlement			As per Revision settlement accounts			Increase or Decrease + or -
		Acres	Assessment	Average per acre	Acres	Assessment	Average per acre	
I	Tank Gardens	998	2,721	Rs. 2 11 6	1,514	9,988	Rs. 6 7 6	Rs. 4 6 0
II	Gardens receiving indirect benefit from tanks, streams, etc.	1,735	9,467	5 7 1	1,986	9,992	5 0 6	-0 6 10
II(a)	Gardens under self dependent wells	115	741	5 1 9	22	59	2 10 11	-2 6 10
(b)	Gardens as in III (a) but assessed at dry rates owing to the failure of wells	82	404	4 14 10	30	73	2 6 11	-2 7 11
IV	Old dry coconut gardens	2,360	13,335	5 10 5	3,582	20,112	5 9 10	-0 0 7
V	New gardens under wells sunk since original settlement, some self dependent, but most of them indirectly benefited	0	0	0	0	0	0	0
		0	0	0	627	2,714	4 5 3	0
VI	New dry coconut gardens	0	0	0	0	0	0	0
	Total	2,360	13,335	5 10 5	1,909	22,826	5 6 9	-0 3 5

It will be seen that though the maximum adopted is Rs. 12, the average even of the tank irrigated gardens is very little in excess of the average wet rate which is Rs. 6-3-7. This is because of the insignificance of the area under high class perennial crops. The different classes of well-gardens have been assessed in proportion to their merits, and in conformity with the Rules on the subject. The only other point I need comment on is the fact that the difference between the existing and the proposed average rates is a very small one of Re. 0-3-8. The explanation is that, though the maximum at original settlement was Rs. 16, there was no opportunity for any general application of that high rate or of any other like it to the gardens in the taluk. Then again, we must recollect that the subject of garden assessment had begun to draw attention and been discussed well before the original settlement was introduced in the Chikballapur

No. R. 11461-72—L. S. 33-20-3, DATED 14TH APRIL 1921.

Taluk, and a policy adopted which led to the rates prescribed on gardens under tanks being assimilated more closely to wet rates than they were in the case of the taluks previously settled. These causes tended to keep the old average low; consequently, the difference between this and the average under the present proposals, is not so striking as it might otherwise have been.

45. The total results of my proposals for the taluk are shown in the table below:—

Class	Description of land	As per original settlement			As per revision survey			Increase or Decrease	Remarks
		Acres	Assessment	Average rate per acre	Acres	Assessment	Average rate per acre		
1	2	3	4	5	6	7	8	9	10
I.	Dry ...	28,162	48,267	1 11 5	27,745	53,389	1 14 9	+0 3 4	+12.1%

The average on the dry assessment is increased by only a fraction over 12 per cent. Though in strict justice a heavier increase could have been levied without injuring the raiyat, it is inexpedient to do so, as the rates obtaining in some of the neighbouring tracts are much lower, and the contrast which is already strong, might become stronger still. The "wet" average shows a very slight increase of 0.5 per cent which is due, not to any raising of the standard of assessment, but to improvement in the general quality of the irrigation on account of the recent construction of the important tank of Srinivasasagara at a cost of over one and a half lakhs of rupees, and as the result of the expenditure incurred in bettering the condition of some of the old tanks. A reduction of 3.7 per cent has been effected on the average garden rate.

46. The net result of these processes will be that the revenue of the taluk will be raised by Rs. 8,744 or by 6.7 per cent,—a very modest increase, and one that ought to give good scope during the term of the coming settlement, for increasing prosperity to the raiyat.

No. R. 11461-72—L. S. 33-20-3, DATED 14TH APRIL 1921

47. The table I give next shows how much of assessed waste land of each class remains on hand. The only remark called for is that there is not much left of *khushki*, little is left of 'rice' land, and practically nothing of the gardens.

Class	Dry			Wet			Garden			Total		
	Acres	Assessment	Average rate per acre	Acres	Assessment	Average rate per acre	Acres	Assessment	Average rate per acre	Acres	Assessment	Average rate per acre
1	2	3	4	5	6	7	8	9	10	11	12	13
I	11,184	18,731	1 10 10	392	2,066	5 4 3	99	140	3 9 5	11,615	20,940	1 12 10
II	1,601	2,146	1 5 5	85	165	5 7 6	5	20	1 0 0	1,691	2,631	1 8 11
Total ..	12,785	20,880	1 10 2	477	2,531	5 1 11	11	160	3 10 2	13,306	23,571	1 12 4

48. The irrigation cess will have to be levied separately according to standing orders. Since the cess has hitherto been considered to be included in the assessment, the taking of an *anna* per rupee separately may be said to be equivalent to imposing an additional levy of $6\frac{1}{4}$ per cent of the assessment of the lands concerned.

49. The usual statements and a map of the taluk are appended to this report.

50. I beg that the sanction of Government to these proposals may be obtained and communicated to me early.

I have the honor to be,

Sir,

Your most obedient servant,

D. K. DARASHAH,

Superintendent.

No. R. 11461-72—L. S. 33-20-3, DATED 14TH APRIL 1921.

**PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.**

GENERAL AND REVENUE DEPARTMENTS.

READ—

Government Proceedings No. 4977-86—R. 144, dated the 14th September 1881, passing orders about the Settlement of the Dodballapur Taluk in the Bangalore District.

2. Letter No. 121, dated the 4th November 1920, from the Superintendent of Revenue Survey and Settlements in Mysore, submitting proposals " for the Revision Settlement of the original Dodballapur Taluk.

(Printed as an accompaniment.)

3. Letter No. 213, dated the 26th February 1921, from the same officer, forwarding with his remarks, the opinions of the Revenue Commissioner and the Deputy Commissioner, Bangalore District, on the proposals contained in the letter read above.

Order No. R. 11441-52 —L. S. 34-20-3, dated 14th April 1921.

The proposals relate to the revision of the assessment of 207 villages, of which 188 are in the present Dodballapur Taluk and the remaining 19 villages in the Bangalore Taluk.

2. The tract consists of an area of about 219 sq. miles and is practically an open country, except to the north and north-west, where there are some hills. The climate is generally cool and healthy. The average annual rainfall ranges from 24 to 31 inches.

3. The chief sources of irrigation are tanks and wells. There are 134 tanks of which 46 are major and 88 minor. Forty-four and 56 of these respectively have been restored. There are also 716 wells used for agriculture, most of which serve only as temporary reservoirs for supplementing the tank water.

4. The cultivation consists essentially of dry crops, such as ragi, avare, togari oil-seed, tobacco, chillies, etc. Paddy and sugarcane are also grown under tanks. Wet cultivation has increased during the current settlement.

5. The taluk is well served in the matter of communications. There are seven important high roads and numerous village roads and cart-tracks. The Bangalore-Guntakal Railway line passes through the taluk and there are three Railway Stations, within the limits of the taluk. The Bangalore-Poona line almost touches the southern boundary of the tract.

6. During the first decade of the current settlement, there was a decline in the population of the tract, by about 30%, i. e., it decreased from 58,350 in 1871 to 40,484 in 1881, but during the next three decades the position was gradually regained and in 1911, the population was 62,719 or 7½% more than the pre-famine figure.

7. The agricultural resources of the taluk have increased as noted in the margin.

	Increase.	
Houses	... 113 per cent.	The prices of all the food grains have increased by more
Castle	... 181 "	than 100% the increase being as high as 620% in the case
Ploughs, etc.	... 54 "	of Bengal gram. The value of land has correspondingly

ly increased. The Revenue history of the taluk is of a very satisfactory nature, showing a steady improvement in revenue year after year, due to the expansion of cultivation under all heads. The condition of the raiyats in the tract has thus materially improved since the original settlement.

No. R. 11441-52—L. S. 34-20-3. DATED 14TH APRIL 1921.

8. The Survey Superintendent proposes to revise the existing rates as shown below, keeping intact the old grouping of the villages into 3 classes :—

		Maximum rate per acre		Average rate per acre	
		Original	Revised	Original	Revised
Land	Group	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
Wet	I	9 0 0	9 8 0	5 6 7	5 11 8
"	II	9 0 0	9 8 0	5 8 1	5 13 2
"	III	9 0 0	9 8 0	5 5 9	5 12 5
Dry	I	2 12 0	3 4 0	1 8 7	1 13 1
	II	2 8 0	3 0 0	1 7 3	1 11 11
	III	2 4 0	2 12 0	1 4 3	1 8 9
Garden	I			7 14 2	6 10 3
	II	16 0 0}		7 14 4	6 5 8
	III	10 0 0}	12 0 0	7 3 8	5 14 9
		General	average.	2 0 4	2 4 8

The above proposals result in an increase of Rs. 0-4-1 or 13% in the general average rate resulting in an increased revenue of Rs. 18,467 per annum.

9. The revised rates referred to above were, under the standing orders, duly published for the information of the several villages concerned and have been looked upon favourably by the villagers concerned except in the case of three villages in respect of which a reduction of the proposed dry maximum rate is prayed for. Both the Deputy Commissioner and the Revenue Commissioner generally agree to the revised rates which are characterised as quite moderate and reasonable.

10. On a careful consideration of the several points referred to above, Government consider that the revised rates proposed by the Superintendent as detailed in para 8 *supra* are moderate and quite justified, having regard to the substantial improvement in the agricultural and material prosperity of the taluk, since the original settlement, and are accordingly pleased to sanction them. They will be announced as soon as possible and brought into force with effect from the year 1921-22, with the usual guarantee of thirty years.

B. RAMASWAMIYA,
Secy. to Govt., Rev. Dept.

To—The Superintendent, Revenue Survey and Settlements in Mysore.
The Revenue Commissioner in Mysore.
The Deputy Commissioner, Bangalore District.
The Deputy Commissioners of other Districts.
The Director of Agriculture in Mysore.
The Comptroller to Government.

PRESS TABLE.

Exd.— c. R.

No. R. 11441-52—L. S. 34-20-3, DATED 14TH APRIL 1921.

ACCOMPANIMENT.

I have the honour to submit herewith proposals for revising the rates of assessment in the Doddballapur Taluk as it stood at the time of the original settlement.

2. *Constitution*.—This taluk consisted of 271 villages at the time of the original settlement, of which, 62 villages were absorbed in the neighbouring ones, two happened to be Inam villages, and 3 villages were included in the waterspread of the He-sarghatta tank, leaving a balance of 204 villages. Three villages were newly formed since the original settlement, and there are thus 207 villages now existing with an area of 219, square miles to which the present proposals refer. Out of these villages, 188 are situated in the present Doddballapur Taluk, and the remaining 19 villages are included in the Bangalore Taluk.

3. *Boundaries*.—This taluk is bounded on the north and north-east by the Goribidnur and Chickballapur Taluks, on the east by Devanhalli, on the south by Bangalore and Nelamangala Taluks, and on the west and north-west by the late Koratagere Taluk of the Tumkur District.

4. *Physical Features*.—The taluk is an irregular oblong in shape, about 18 miles from north to south and 14 miles from east to west. It is practically an open country with undulating plains excepting in the north and north-west, where there is a range of hills through which, a pass descends to the low country of Goribidnur. The river Arkavati takes its rise in the north-east on the Nandidrug hills and flows in a south-westerly direction, feeding several of the tanks and draining almost all parts of the taluk excepting in the extreme north which is drained by the North Pennar and its tributaries.

5. *Forests*.—There are no forests of any importance, excepting a stretch of scrub jungle in the north-west. A State Forest is in the course of formation near Makalidrug in the north, and there are two plantations at Hulkunte and Kolur.

6. *Climate*.—The climate is generally cool and healthy almost similar to that of Bangalore, though fevers prevail to a limited extent in the northern villages in the early part of the cold weather. Epidemic diseases such as plague and influenza periodically infect the villages as in other parts of the State.

7. *Rainfall*.—Two rain-gauges are maintained one at Doddballapur and the other at Sasalu. The quantities gauged in these stations since 1893, are noted below for ready reference:—

Year.			Doddballapur.	Sasalu.
1893	...	...	35'17	..
1894	...	...	35'59	..
1895	...	...	26'42	..
1896	...	...	33'22	...
1897	...	...	36'17	...
1898	...	...	41'44	..
1899	...	...	28'50	...
1900	...	...	20'38	...
1901	...	...	38'25	..
1902	...	...	30'66	...
1903	...	...	52'50	...
1904	...	...	21'22	..
1905	...	...	26'30	21'90
1906	...	...	34'30	33'58
1907	...	...	20'76	29'70
1908	...	...	21'91	16'52
1909	...	...	38'57	26'01
1910	...	...	40'82	45'10
1911	...	...	20'60	17'88
1912	...	...	33'76	16'35
1913	...	...	25'81	10'95
1914	...	...	18'38	13'80
1915	...	...	33'48	28'00
1916	...	...	42'34	27'65
1917	...	...	37'23	24'70
Total			793'26	331'14
Average			31'73	24'70
			25 years' average. 13 years' average.	

No. R. 11441-52—L. S. 34-20-3, DATED 14TH APRIL 1921.

It will thus be seen that the average quantity gauged at Doddballapur during the past 25 years is 31·73 inches, while at Sasalu, the average for 13 years is 24·70. Two additional stations had been opened at Hulikunte and Golhalli in 1914 and 1915, but appear to have been since closed. The following table shows the average number of rainy days and the quantities gauged in those months during the last 46 years. Monthly and annual number of average rainy days and the quantities gauged as per Government Order No. 6840-90—A. & E. 93-18-2, dated 24th January 1919.

District	Station	Number of years	January	February	March	April	May	June	July	August	September	October	November	December	Annual
Bangalore	Doddballapur ...	46	0·2	0·3	0·6	1·8	1·5	1·3	6·4	7·4	7·5	6·6	3·9	0·7	12·6
	Quantity gauged	16	6·12	0·17	0·51	1·00	3·07	2·46	3·11	4·24	5·57	5·69	2·35	0·47	28·69

There have been no famines in the tract under report during the currency of the original settlement, though there was a partial failure of crops in 1891, 1914, and 1918, owing to insufficient rainfall, the quantities gauged at Doddballapur in those years being only 12·71, 18·38 and 17·04, respectively, far below the average.

8. *Soils*.—The soils in this taluk are generally red mixed with sand peculiarly well suited for the cultivation of ragi and other dry crops, which are the staple food grains of the country. Other varieties of soil are also met with. The soils in the north and north-west are generally poor, while those in the centre and south are comparatively rich varying in colour from deep brown to red. Black soils are rare in this taluk.

9. *Irrigation*.—The chief sources of irrigation are tanks and wells. There are altogether 134 tanks in this tract, of which, 46 are classed as major, the remaining 88 being minor tanks. Two of the major tanks remain unrestored while there are still 32 minor tanks requiring restoration. The general condition of the tanks may be said to be good. It is ascertained from the Department of Public Works that a sum of Rs. 1,40,289, was spent by Government towards the repairs of irrigational works, during the currency of the present settlement.

There are so many as 716 wells used for agriculture, most of them being goondies or pits, serving as temporary reservoirs for supplementing tank water in hot weather. There are no river fed channels in this area, but some of the tanks especially in the Arkavati series are very good, containing almost a perennial supply of water.

10. *Crops and Cultivation*.—Doddballapur is essentially a dry crop taluk, ragi, avare, togari, oil-seeds, tobacco, chillies, same and haraka are the principal dry crops grown. Ragi and avare grown in the neighbourhood of Rajaghatta are said to be the best in the whole State. As elsewhere, ragi is rarely grown alone in these parts. Rows of avare, togari and oil-seeds intervene. Recent experiments conducted in the Agricultural Department go to show that single crop cultivation yields better than such mixed cultivation. Paddy and sugar-cane are the principal wet crops grown under tanks wherever facilities exist therefor. Wet cultivation is now more freely resorted to than at the time of the original settlement. "*Sanna bhatta*" is rarely grown, the principal variety which is generally cultivated being "*Maralakanthe*."

Cocoanut and areca gardens are not numerous in this taluk excepting under the Madure Amanikere and Aralamallige tanks. Vegetable gardens are to be seen everywhere. Fine potatoes and other kinds of vegetables are grown in the vicinity of Doddballapur.

The percentage of area under the different kinds of crops is as follows :—

Jola	...	...	...	...	28
Sugar-cane	...	...	...	...	192
Ragi	...	...	...	...	6675
Gram	...	...	...	...	257
Rice	...	...	...	...	1068
Other cereals	...	...	...	...	967

No. R. 11441-52—L. S. 34-20-3, DATED 14TH APRIL 1921.

Non-food	...	...	...	...	68
Oil seeds	...	...	...	...	111
Food	...	...	...	...	28
Condiments	...	...	...	...	04
Garden produce	...	...	...	...	07
Total					100 00

11. *Communications.*—This taluk is well supplied with roads in all directions as specified below :—

- (1) Bangalore-Hindupur road runs from south to north right in the middle of the taluk.
- (2) Kolac-Sompur road from east to west passing through Dodballapur.
- (3) Dodballapur-Devanhalli road.
- (4) Dodballapur-Nelamagala road.
- (5) Dodballapur-Subramanya road.
- (6) Dodballapur-Devanhalli loop road passing through the Railway Station.
- (7) Dodballapur-Maddur road.

Besides the above high roads, there are numerous village roads and cart-tracks throughout the taluk.

Road No. 7 is not much frequented and is in consequence out of order fit for traffic only in fair weather.

12. *Railways.*—The Bangalore-Gantakal section of the Madras and Southern Mahratta Railway passes through the tract under report almost parallel to the Bangalore-Hindupur road, with stations at Rajankunte, Dodballapur and Makalidrug.

The Poona line almost touches the southern boundary of this taluk with a station at Golhalli within a couple of miles of the border.

13. *Markets and Fairs.*—Weekly markets or *santhes* are held at Melekote, Hanabe, Dod Hejjajee, Dodballapur, Hadripur Hulukunte, Channadevi Agrahar, and Kakol. These serve for local consumption only, the bulk of the trade of this taluk being transacted in Bangalore, which affords a ready market for all the surplus produce grown. An annual fair or jatra is held at Subramanya near Makalidrug in the month of January, when thousands of people congregate. A cattle fair is also held in this connection and first class bullocks are brought here for sale from all parts of the State. According to the Hand book available in the taluk, 50,000 people are said to collect there every year, and about 23,000 cattle are brought for sale, the aggregate amount fetched being Rs. 45,00,000.

14. *Exports and Imports.*—The statistics of exports and imports recorded in the Taluk Hand book are extracted below, which give a fair idea of the trade in the tract under report :—

Name of article	Quantity exported	To what place
EXPORTS.		
Ragi	10,000 kandis	Bangalore.
Paddy	1,000 "	do
Horse gram	700 "	do
Oil seeds	300 pallas	do
Tamarind	100 tons	do
Jaggory	700 tons	do
Sadies or cloths which Indian ladies generally use.	700 "	Bangalore and Mysore. Belgaum. Dharwar. Hubli.
IMPORTS.		
Rice	6,000 pallas	Bangalore.
Bengal gram	200 "	do
Black gram	160 "	do
Togari	1,000 "	do
Dal	30,000 "	Bangalore and Tirupathur.
Sugar	60 tons	Bangalore.
Kobra	10 tons	Bangalore and Tiptur.
Ghee	10 tons	Bangalore and Nanjangud.
Kerosene oil	5,000 tins	Bangalore and Madras.
Supari	4 tons	do
Yarn	5,000 bales	do

No. R. 11441-52—L. S. 34-20-3, DATED 14TH APRIL 1921.

15. *Manufacture and Industry.*—There is a tile factory just opened by Mr. Chandrasekaraia, close to the railway station at Dodballapur. He has purchased a steam engine of 24 horse power but it is not yet working for want of some of the parts which are said to be not available now. Two hand presses of iron are installed for manufacturing tiles of Mangalore pattern. Each press turns out 1,000 tiles per day and a kila is burnt when 15,000 tiles are ready. The engine and other accessories are said to have cost the owner about Rs. 30,000 till now.

Dodballapur is fast becoming a great weaving centre. Superior cloths of Arlepet and Dharmavaram pattern are manufactured to a large extent and exported to different places. There are in all 951 looms now working, of which about 40 are of the fly shuttle pattern. About one lakh of rupees worth of cloths are manufactured every year.

There are in all 80 mills, of which 34 are used for pressing sugar-cane juice and the other 46 are oil mills. There are 51 goldsmiths shops in the area under report.

16. *Population.*—The population of the tract under report as compiled from the various census reports is noted hereunder :—

Year	Population	Density
1871	58,350	266 per square mile.
1881	40,434	185 "
1891	50,200	229 "
1901	57,954	265 "
1911	62,719	286 "

The great famine of 1878 seems to have done terrible havoc in this taluk as elsewhere in the eastern half of the State. So many as 17,866 souls or about 30 per cent of the population were swept away, but the recuperative powers of this tract are so good that in two decades, the normal strength was almost resumed and in 1911, there was actually an increase of 4,369 persons or nearly 7½ per cent over 1871, the pre-famine year. The density on the arable area is 458 per square mile.

The following table shows the variations in population in the different groups of this taluk :—

Statement showing the density of population per square mile in several classes of Dodballapur Taluk, Bangalore District.

Class	Total area including unarable land	Square miles	Total arable land	Square miles	Population					Density per square mile (according to census of 1911)	
					1871	1881	1891	1901	1911	On total area	On arable area
I	62,878	98	42,624	67	30,358	23,627	26,973	31,331	33,066	337	494
II	34,897	55	23,739	37	14,925	9,516	12,595	14,838	16,399	298	443
III	42,513	66	21,432	33	13,067	7,447	10,632	11,785	13,254	201	402
Total	140,288	219	87,795	137	58,350	40,484	50,200	57,954	62,719	286	458

No. R. 11441-52—L. S. 34-20-3, DATED 14TH APRIL 1921.

17. *Agricultural resources.*—The following is a comparative statement of the agricultural resources of this taluk past and present :—

Items				At original settlement	As per resurvey	Increase or decrease + or -	Remarks
Houses Tiled	...	...	...	77	288	+ 211	+ 274%
Mud	...	...	...	3,745	9,251	+ 5,506	+ 147%
Thatched	...	...	...	2,765	4,493	+ 1,728	+ 62%
Total				6,587	14,032	+ 7,445	+ 113%
Horned cattle	...	...	...	64,084	65,867	+ 1,783	+ 3%
Carts Large	...	...	...	254	2,504	+ 2,250	+ 886%
Small	...	...	...	904	753	- 150	- 17%
Total				1,158	3,258	+ 2,100	+ 181%
Ploughs	...	...	...	6,268	9,657	+ 3,389	+ 54%
Wells, Agricultural	...	...	...	...	716	...	...
Others	...	...	...	...	614	...	...
Total				...	1,330	..	..

It will be seen that there has been a decided improvement under all heads. Considering the general prosperity of the tract, a larger percentage under horned cattle might have been expected but it must be borne in mind that owing to a large demand from outside, the cattle are sold away as fast as they are purchased. The cattle are mostly of the Hallikar kind and the general condition is good.

There are besides, 32,173 sheep and 25,099 goats in this taluk, which furnish rich manure for agricultural lands.

18. *Modes of Husbandry.*—Old methods of agriculture are still in vogue in most of the villages. Iron ploughs manufactured in the Mission factory at Kolar are just being used in a few villages, and the people are beginning to realize the advantages derived from using the English ploughs.

Stone rollers are now generally used for threshing ragi in place of the old method of using bullocks for the purpose, thereby saving considerable time and labour. What was taking four days under the old method is now done in one day.

Iron mills are used everywhere in place of the old wooden mills for crushing sugar-cane.

19. *Value of land.*—The value of land has risen in proportion to the rise in prices of food grains. Six hundred and ninety-seven sales and 425 mortgages of agricultural land registered in the books of the Registration Department, were examined and the following statement exhibits the ratio of the amount fetched to the survey assessment.

Sales and Mortgages.

Sales.—Number of transactions examined				...	...	697
Total amount of prices of the land sold				...	Rs.	94,321
Total survey assessment				...	..	6,018
Ratio				...	..	16
				times the assessment.		
Mortgages.—Number of transactions examined				...	...	425
Total amount of loans				...	Rs.	69,093
Total assessment				...	..	4,737
Ratio				...	..	15
				times the assessment.		

20. The following statement shows the gradual rise in the prices of all the agricultural products since the date of the original settlement. As no statistics were available in the taluk from 1881 to 1905, the figures quoted in the crop reports are extracted for those years, and the figures from 1906-07 to 1917-18 are compiled from the statistics furnished by the taluk. There has been a still further rise in 1918-19 and 1919-20, which may be considered abnormal. It will be seen from this statement that the rise in the prices of all the food grains is above 100 per cent, while in the case of Bengal gram, it is so high as 620 per cent.

No. R. 11441-52—L. S. 34-20-3, DATED 14TH APRIL 1921.

15. *Manufacture and Industry.*—There is a tile factory just opened by Mr. Chandrasekaraia, close to the railway station at Dodballapur. He has purchased a steam engine of 24 horse power but it is not yet working for want of some of the parts which are said to be not available now. Two hand presses of iron are installed for manufacturing tiles of Mangalore pattern. Each press turns out 1,000 tiles per day and a kiln is burnt when 15,000 tiles are ready. The engine and other accessories are said to have cost the owner about Rs. 30,000 till now.

Dodballapur is fast becoming a great weaving centre. Superior cloths of Arlepet and Dharmavaram pattern are manufactured to a large extent and exported to different places. There are in all 951 looms now working, of which about 40 are of the fly shuttle pattern. About one lakh of rupees worth of cloths are manufactured every year.

There are in all 80 mills, of which 34 are used for pressing sugar-cane juice and the other 46 are oil mills. There are 51 goldsmiths' shops in the area under report.

16. *Population.*—The population of the tract under report as compiled from the various census reports is noted hereunder :—

Year	Population	Density
1871	58,350	266 per square mile
1881	40,484	185 "
1891	50,200	229 "
1901	57,954	263 "
1911	62,719	286 "

The great famine of 1878 seems to have done terrible havoc in this taluk as elsewhere in the eastern half of the State. So many as 17,866 souls or about 30 per cent of the population were swept away, but the recuperative powers of this tract are so good that in two decades, the normal strength was almost resumed and in 1911, there was actually an increase of 4,369 persons or nearly 7½ per cent over 1871, the pre-famine year. The density on the arable area is 458 per square mile.

The following table shows the variations in population in the different groups of this taluk :—

Statement showing the density of population per square mile in several classes of Dodballapur Taluk, Bangalore District.

Class	Total area including unarable land	Square miles	Total arable land	Square miles	Population					Density per square mile (according to census of 1911)	
					1871	1881	1891	1901	1911	On total area	On arable area
I	62,878	98	42,624	67	30,358	23,527	26,973	31,331	33,066	337	494

Compared with the year 1909-10 and 1917 18													
Compared with the year 1879-80 and 1917 18													

These figures have been taken from the statistics received from the taluk

No. R. 11441-52--L. S. 34-20-3, DATED 14TH APRIL 1921.

21. *Labour and Wages.*—The wages paid to agricultural and other labourers have also risen though not quite in proportion to the rise in the prices of food grains. Unskilled labourer is paid at 4 to 6 annas per man and 2½ to 4 annas to women and children. The skilled labourers generally earn from one to 1½ rupees per day according to the quality of the work turned out.

22. *Re-survey.*—There were 17,698 survey numbers as per Akaraband and 4,002 numbers were newly made during re-survey as the result of sub-division of large survey numbers above the respective maxima and the separation of khates above the minima under the re-survey rules. There are thus in all 21,700 survey numbers as per re-survey. The following statement shows the areas under different heads as compared with the original survey.

Past and present Survey compared:—

(a) Original Survey numbers ...	..	..	..	17,698
(b) Re-survey numbers ...	..	..	..	21,700
				+ 4,002

Description of land				Former Survey acres	Present Survey acres	Difference + or —
				Acrea	Acrea	
Arable dry crop land	...	...	...	77,675	76,930	— 745
Rice or wet land	...	...	...	10,054	8,796	—1,258
Garden land	...	...	...	1,422	2,069	+ 647
Unarable land	...	...	...	50,926	52,493	+ 1,567
Total				140,077	140,288	+ 211

It will be seen that there has been a decrease of 745 acres of dry crop land and of 1,258 acres under rice, while there is a corresponding increase in the extent of unarable land. This is due to the submersion of three villages in the bed of the Hessarghatta Reservoir and the formation of two plantations. There is an increase of 647 acres in the extent of garden land which is mostly chiller bagayeth. The net increase of 211 acres in the total extent is negligible, being due to correction of errors found in the original survey.

23. *Re-classification.*—The old soil value is left undisturbed except in the case of kharab lands newly made available for cultivation, which had not been originally classified. The re-classification of water-supply to wet and garden lands, was carried out under the rules of 1896, since amplified. New bagayet taktas were prepared for all the garden survey numbers in the taluk.

24. *Revenue History.*—Appendix A shows the revenue history of the taluk compiled from the statistics furnished by the Amildar of the Dodballapur Taluk. No figures are available from the year of the original settlement upto 1892-93. In spite of repeated reminders issued, no statistics of collection were furnished for the 19 villages included in the present Bangalore Taluk. As the report is already overdue it is not desirable to wait any longer. It will be seen from this statement that there has been a steady rise in the collections year after year except in the years 1898-99 and 1899-1900. The slight fall in these years is probably due to the prevalence of plague in an epidemic form in almost all the villages of the taluk. The figures noted in the column of remissions are all insignificant except in the year 1909-10, when a remission of Rs. 11,412 was granted for failure of wet crops in the previous year. The small remissions shown year after year are explained by the Amildar as being due to irrecoverable arrears of land revenue and other items owing to death, desertion and other causes, including chowtai remissions. There has thus been only one bad year during the currency of the present settlement, necessitating the grant of remissions to an appreciable extent. A quinquennial abstract of Appendix A is given hereunder for ready reference.

No. R. 11441-52—L. S. 34-20-3, DATED 14TH APRIL 1921.

		Dry		Wet		Garden		Total	
		Acres	Assessment	Acres	Assessment	Acres	Assessment	Acres	Assessment
12	13	14	15	16	17	18	19	20	
1881-82		Year of	(Original Settlement	Figures not available.					
1893-94 (one year)	...	21,150	27,321	1,020	1,902	180	1,272	22,650	31,195
1898-99 to 1902-03 (5 years' average.)	-2%	20,220	21,264	1,709	9,395	192	1,427	22,130	35,686
1905-06 to 1909-10 (5 years' average.)	+6%	15,055	19,161	713	3,713	111	815	15,879	24,017
1910-11 to 1914-15 (5 years' average.)	+17%	10,807	13,548	302	1,523	57	115	11,166	15,496
1915-16 to 1917-18 (3 years' average.)	+20%	7,508	10,591	150	793	12	371	7,706	11,761

The steady improvement shown in the collections year after year, proves, if any proof is wanted, that the present rates of assessment are very moderate as admitted by the then Deputy Commissioner in 1880. The increase of revenue is solely due to expansion of cultivation under all the heads. The following statement shows that there has been an increase of 17,872 acres or 33.5 per cent in the extent of cultivated area, while the decrease in the area of unoccupied land is 35,918 acres or nearly 79 per cent.

Particulars	Occupied land			Unoccupied land			Remarks
	Area as per Original Settlement report	Area as per Revision Survey	Increase or Decrease	Area as per Original Settlement report	Area as per Revision Survey	Increase or Decrease	
1	2	3	4	5	6	7	8

Wet ...	4,395	7,600	+ 3,205	1,299	127	- 1,172	
Garden ...	1,218	1,987	+ 769	144	12	- 102	
Total ...	53,415	71,217	+17,872	45,550	9,602	-35,918	

25. *Grouping.*—Coming now to the immediate object of this report, *viz.*, the division of villages into different groups for purposes of revision settlement, I see no good reason to interfere with the old arrangement, though some of the villages of the Tubigere Hobli in the vicinity of the Makalidrug Railway Station might well be transferred from the third to the second group. As any interference with the old grouping would result in undue disparity in the revision assessment in the different villages, I have decided not to disturb the old arrangement for the sake of a few villages. The villages of this taluk are accordingly divided into three groups. The first group consists of 98 villages coloured pink on the accompanying map, which are

No. R. 11441-52—L. S. 34-20-3, DATED 14TH APRIL 1921

favourably situated as regards rainfall, roads and railway stations, and are within an easy reach of Bangalore. The second group of 51 villages coloured yellow are not so favourably situated through equally enjoying the good climate and close proximity to Bangalore. The remaining 58 villages coloured blue which are remotely situated in the extreme north and north-west are placed in the third group.

26. *Maximum Rates.*—The present maximum rates are as follows for the different descriptions of land :—

	Dry.	Wet.	Garden.	
I group	2 12 0	9 0 0	16 0 0	For tank irrigated gardens.
II "	2 8 0	9 0 0	10 0 0	For well irrigated gardens.
III "	2 4 0	9 0 0		

For purposes of comparison, the maximum rates prevailing in the neighbouring taluks are noted below :—

		Dry.	Wet.	Garden.	
Bangalore.—					
	I group	3 4 0	10 0 0		
	II "	3 0 0	9 0 0		
	III "	2 10 0	8 0 0	10 0 0	As per revision.

Chikballapur.—					
		Dry.	Wet.	Garden.	
I "	I "	2 12 0	9 0 0	16 0 0	Tank irrigated gardens.
Original rates	II "	2 8 0	9 0 0	6 0 0	Well irrigated gardens.
Devanahalli.—					
		Dry.	Wet.	Garden.	
Original rates.	I "	2 12 0	9 0 0	12 0 0	
	II "	2 8 0	9 0 0	12 0 0	

The present maximum rates of the Doddaballapur Taluk were fixed nearly 40 years ago when ragi and rice were selling at 29 and 13 seers per rupee respectively. The prices have now considerably risen, and the Government are justly entitled to a share of the increased profits on land. Considering the general rise in the prices of other articles also, I would propose a moderate increase of 8 annas to the old maximum dry and wet rates. The garden maximum in the case of tank fed gardens is cut down by 25 per cent and a uniform rates of 12 rupees is fixed for all the groups. The well gardens are, of course, assessed under the rules prescribed by Government in this behalf, as since modified in 1918.

The following table shows the present and the proposed maximum rates placed in juxta position :—

Groups	Old maximum rates			Revision maximum rates		
	Dry	Wet	Garden	Dry	Wet	Garden
I	2 12 0	9 0 0	16 0 0	3 4 0	9 8 0	
II	2 8 0	9 0 0	10 0 0	3 0 0	9 8 0	12 0 0
III	2 4 0	9 0 0		2 12 0	9 8 0	

No. R. 11-41-52—L. S. 34-20-3, DATED 14TH APRIL 1921.

These rates fit in well with those of the adjoining taluks. The villages of the first and second groups are almost similar to those of the Bangalore Taluk, and even the villages of the third group adjoin those of the first class in the late Koratagere Taluk. Thus, the increases proposed are every moderate and are fully justified under the present state of things.

27. *Effects of Revision.*—The following statement shows at a glance the effects of Revision by adopting the maximum rates proposed by me :—

Class	Description of land	As per original Settlement			As per proposed Settlement			Increase or decrease	Remarks
		Acres	Assessment	Average	Acres	Assessment	Average		
I	Dry	30,098	Rs. 46,111	Rs. 1 8 7	29,946	Rs. 51,152	Rs. 1 13 1	Rs. +0 4 6	+16 31
	Wet	4,191	22,689	5 6 7	4,328	22,700	5 11 8	+0 5 1	+5 87
	Garden	150	5,127	7 11 2	856	5,683	6 10 3	-1 1 11	-13 79 ³ / ₄
	Miscellaneous		65						
	Total	34,912	74,192	2 2 0	34,730	82,635	2 6 1	+0 4 1	+12 01 ³ / ₄
II	Dry	16,932	24,766	1 7 3	16,925	29,316	1 11 11	+0 4 8	+20 07 ³ / ₄
	Wet	2,605	14,338	5 8 1	2,865	13,893	5 13 2	+0 5 1	+5 77 ³ / ₄
	Garden	376	2,969	7 11 4		3,115	6 5 8	-1 6 8	-19 53 ³ / ₄
	Miscellaneous		20						
	Total	19,913	41,913	2 1 8	19,905	47,651	2 6 1	+0 4 8	+18 86 ³ / ₄
III	Dry	15,111	19,191	1 4 3	14,859	24,013	1 8 9	-0 1 6	-22 22 ³ / ₄
	Wet	1,891	7,455	5 5 9	1,287	7,385	12 5	+0 6 8	+7 77 ³ / ₄
	Garden	275	1,988	7 3 8	196	2,561	5 14 9	-1 3 11	-18 04 ³ / ₄
	Miscellaneous		12						
	Total	16,540	26,646	1 11 3	16,582	32,929	1 15 9	+0 4 6	-16 51 ³ / ₄
	Dry	62,174	90,088	1 7 2	61,630	1,06,811	1 11 9	+0 4 7	+19 78 ³ / ₄
	Wet	8,190	14,482	5 6 11	7,602	13,728	5 12 1	+0 5 2	+5 91 ³ / ₄
	Garden	1,301	10,083	7 12 0	1,987	12,679	6 6 1	-1 5 11	-17 67 ³ / ₄
	Miscellaneous		97						
	Grand Total	71,664	1,41,751	2 0 1	71,217	1,63,918	2 4 5	+0 4 3	+13 40

It will be seen from this statement that there has been an increase of 4 annas, 7 pies in the average dry rate, 5 annas, 2 pies in the average wet rate, while there is a decrease of Rs. 1-5-11, in the average garden rate. Taking all the descriptions of land together, there is an increase of only 4 annas, 4 pies, or 13 per cent in the total average rate of assessment, which is undoubtedly very reasonable and moderate.

28. *Garden Rates.*—Details of assessment on garden lands showing the average rates under each head are given hereunder :—

Number	Description	At original Settlement			According to Revision proposed			Increase or decrease
		Acres	Assessment	Average rate per acre	Acres	Assessment	Average rate per acre	
1	2	3	4	5	6	7	8	
I	Tank Gardens	398	Rs 3,062	Rs 7 3 3	969	Rs 6,387	Rs 6 1 1	Rs -1 15 2
II	Gardens receiving indirect benefit from tank, streams, etc.	760	5,528	7 3 5	793	7,763	6 0 1	-1 1 1
III	(a) Gardens under self dependent wells	70	151	6 7 1	26	71	2 13 6	- 9 7
	(b) Gardens as in III (a) but assessed at dry rates owing to the failure of wells	38	210	6 5 1	44	103	2 5 5	-3 15 8
IV	Old dry coconut garden.							
V	(a) New gardens under wells & tank since the original settlement				7	16	2 1 7	
	(b) Gardens as in V (a) but indirectly benefited from tank streams, etc.				236	1,319	5 9 5	
VI	New dry coconut gardens							
	Total	1,266	9,881	7 12 11	2,069	18,262	6 6 7	-1 6 1

It will be seen that the average rates under the different heads of gardens are well within the maximum rates prescribed by Government in this behalf. There

No. R. 11441-52—L. S. 34-20-3, DATED 14TH APRIL 1921.

has been a total decrease of Rs. 1-6-4 in the average garden rate owing to the liberal policy laid down by Government in respect of well-irrigated gardens.

29. *Comparison of Averages.*—For purposes of comparison, the average rates prevailing in the neighbouring taluks are noted below :—

Taluk	Dry	Wet	Garden
	Rs. a. p.	Rs. a. p.	Rs. a. p.
Bangalore	1 6 10	4 13 7	5 1 7
Nelamangala	1 3 0	4 11 8	4 3 10
Koratagere	0 11 8	3 6 11	5 1 9
Goribidnur	1 2 9	5 5 3	4 11 7
Chikballapur	1 14 4	6 4 1	5 6 4
Dodballapur	1 11 9	5 12 1	6 6 1

Considering that the soils in the Dodballapur Taluk are in no way inferior to those of Chikballapur, the average rates proposed for the former are quite moderate and well suited. The garden average may, at first sight, appear to be a little high, but if we take into consideration the high prices now prevailing and the situation of these gardens within an easy reach of Bangalore, the rate imposed is reasonable and just.

30 *Unoccupied Assessed Waste*—The following financial statement gives details of assessment and average rates under different heads, as regards assessed lands still remaining to be taken up for cultivation.

Statement showing the unoccupied assessed waste, etc., classwar and babwar of Dodballapur Taluk, as per Revision Survey.

Group	Dry			Wet			Garden			Total		
	Acres	Assessment	Average rate	Acres	Assessment	Average rate	Acres	Assessment	Average rate	Acres	Assessment	Average rate
I	3,481	Rs. 5,782	Rs. a. p. 1 10 6	76	Rs. 347	Rs. a. p. 4 9 1	25	Rs. 95	Rs. a. p. 3 12 10	3,582	Rs. 6,204	Rs. a. p. 1 11 9
II	2,315	3,630	1 9 1	10	202	5 0 10	10	40	4 0 0	2,365	3,872	1 10 2
III	3,667	4,784	1 4 10	11	43	4 11 7	7	22	3 2 3	3,685	4,849	1 5 1
Total	9,463	14,196	1 8 0	127	592	4 10 7	42	157	3 11 10	9,632	14,925	1 8 10

As the figures are self explanatory, no remarks are called for.—

31. *Limits of Increase.*—The accompanying classwar statement shows that the increases of assessment proposed are all well within the percentages prescribed by Government.

32. *Conclusion.*—This taluk enjoys a salubrious climate, almost similar to that of Bangalore. The people are well off and almost all the villages are within an easy reach of Bangalore, which affords a ready market for all the agricultural produce of the tract under report. The prices have considerably risen and even excluding the abnormal prices now prevailing, there is undoubtedly a wide margin of profit. Considering all these favourable circumstances, the increase of assessment proposed is very moderate and just to all parties concerned. If the rates proposed are sanctioned, the net result of the revision settlement will be an increase of Rs. 18,467 or 12.76 per cent, on Government occupied lands, which is very reasonable under the existing state of things.

33. *Cesses.*—The local fund and irrigation cesses will be separate levies in accordance with the standing orders of Government.

The usual appendices and a coloured map of the taluk are herewith submitted.

I have the honor to be,

Sir,

Your most obedient servant,

K. G. SHAMANNA,

Deputy Superintendent.

No. R. 11441-52—L. S. 34-20-3, DATED 14TH APRIL 1921.

APPENDIX A.
Revenue Statement for 188 villages of Doddballapur Taluk, Bangalore District.

**Confirmation of sales of timber
and other Forest produce.**

No. R. 11297-8—Ft. 113-20-4, DATED 11TH APRIL 1921.

**PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.**

GENERAL AND REVENUE DEPARTMENTS.

READ—

Government Order No. R. 12161-71—Ft. 143-16 6, dated the 22nd March 1919, defining the relations between the District Forest Officers and the Deputy Commissioners of Districts in matters relating to Forest and the Departmental staff.

2. Government Order No. R. 10480-90—Ft. 218-18-2, dated the 11th March 1920, issuing further orders in the matter and calling upon the Conservator to submit (1) separate proposals regarding the power of the District Forest Officer to confirm sales of timber and other Forest produce, (2) and two different lists showing matters which may be finally disposed of by the District Forest Officers and those which require the orders of the Conservator of Forests.

3. Letter No. 7, dated the 7th July 1920, from the Conservator, submitting (1) proposals in the matter of revision of sale rules, (2) lists showing what matters may be disposed of by the District Forest Officers and what require the orders of the Conservator of Forests and suggesting certain modifications in the Government Orders read above in respect of appointments of Foresters and Clerks.

Order No. R. 11297-8—Ft. 113-20-4, dated 11th April 1921.

The sale of Minor Forest produce was subject to the confirmation of the Deputy Commissioners prior to the Government Order of 22nd March 1919, read above. Under that order, "sales of tangadi and other minor Forest produce" require the confirmation of the Conservator when the sale proceeds exceed Rs. 500 in each case.

The Conservator of Forests now brings to notice that in regard to auction sales of timber and other Forest produce, such as standing timber, bamboos, fuel, grass, etc., there has been a diversity of practice in the several districts and that the rule about fixing *minima* prices is impracticable and is not invariably observed. He suggests, therefore, that the District Forest Officers may be empowered to confirm such sales when the sale proceeds do not exceed Rs. 500 in each case, as in the case of the minor Forest produce. Government approve of the recommendation of the Conservator and direct that the existing rules be amended accordingly.

2. The lists submitted by the Conservator as to the disposal of matters by the District Forest Officers and himself are approved with slight modifications and appended to this order.

3. The order of 22nd March 1919, places the whole of the ministerial staff of the Forest Department on a provincial scale and empowers the District Forest Officers to make appointments on Rs. 20 and 25. The Conservator states that, if appointments on Rs. 25 are allowed to be made by the District Forest Officer, he may appoint a fresh man or promote one of his own office, irrespective of the claims of senior men on Rs. 20 in other districts and suggests therefore that the power of the latter to sanction appointments may be limited to Rs. 20, the lowest in the scale. The number of clerks on Rs. 20 and 25 in the district and the Range Offices is 139.* The effect of the Conservator's proposal will be to throw the responsibility for recruiting and regulating the promotion of a large number of low paid officials on a central, i.e., provincial officer. Government do not consider this will be a satisfactory arrangement. Besides, the Conservator of Forests is also not in a better position than the District Forest Officer to know the merits of such officials in the several districts.

* On pay less than		On Rs. 25
Rs. 25		
District, Offices	20	13
Range Do	35	71
	55	84
Total ...	...	139

No. R. 11297-8—Ft. 113-20-4, DATED 11TH APRIL 1921.

Government direct in these circumstances that in modification of paragraph 13 of their Order No. R. 8727-37—Ft. 54-16-15, dated 22nd February 1918, the ministerial staff on Rs. 20 and Rs. 25 in the districts be treated as district cadre, all higher appointments continuing as Provincial cadre.

4. In Government order dated 22nd March 1919, the power of appointing Foresters on Rs. 25 was vested in the District Forest Officers. The Conservator states that in consequence of the reduction in the number of Foresters from 130 to 30, many of these Foresters have been given permanent liens on clerical appointments though they are unfit for clerical work, that there are a number of supernumeraries also and that many who are acting as Rangers will shortly revert as passed men become available for employment. In these circumstances, he requests that he may be empowered to appoint Foresters, at least temporarily till all the Foresters of the old class are permanently provided for. Otherwise he states that the District Forest Officers will not be able to exercise the patronage properly not being in a position to know the aptitude and work of the men and the number of hands provided for in districts other than their own. Government are, however, of opinion that a change in the existing rules which will have the effect of curtailing the powers of District Forest Officers in the matter is neither desirable nor called for.

Claim to Excise Revenue

No. R. 10958-60—Ex. 59-20-3, DATED 1ST APRIL 1921.

**PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.**

GENERAL AND REVENUE DEPARTMENTS.

Read—

The marginally noted letters from the Excise Commissioner regarding the claim of the Inamdar of Sogala and Garikhalli, Channapatna Taluk, to the Excise revenue from toddy with his opinion thereon.

1. Mis. C. 629-19, dated 1st Nov. 1920.
2. Mis. C. 629-19, dated 12th Jan. 1921.

No. R. 10958-60—Ex. 59-20-3, dated 1st April 1921.

The sannad, of which an unauthenticated copy was produced concedes the Excise revenue from toddy. The Inam Settlement recognises the Inamdar's claim to Excise revenue. Certain Excise registers and accounts are also said to bear evidence to the enjoyment of the revenue by the Inamdar. Government are therefore pleased to recognise the claim of the Inamdar to the Excise revenue from toddy of the villages in question.

2. It is reported that there is no toddy shop in the villages. Payment of Excise revenue to the Inamdar will therefore be regulated by Rules, 2, 3, 5, 6, 7 and 13 of the Rules regulating Inamdar's claims to Excise revenue issued with Government Order No. 2074-83—R. F. 166-92, dated 2nd August 1901.

3. As the villages have, however, reverted to the Palace owing to the death of the Inamdar without issue, the Excise revenue of the villages should be credited to the Palace Funds by the Excise Commissioner.

Correspondence ending with letter No. C. R. 387, dated 16th December 1920, from the Inspector-General of Registration regarding the interpretation of the expression
 1. No. Fl. 5131—35-15-23, dated 16th February 1906 on “behalf of” in the marginally noted Notifi-
 2. No. Fl. 1300—B. 51 09-2, dated 9th September 1910 cations exempting documents executed by or
 on behalf of Co-operative Societies from payment of stamp and registration fees.

Order No. R. 11055-7—Regis. 28-19-9, dated 4th April 1921.

The notifications read above exempt from payment of stamp and registration fees documents executed by or on behalf of Co-operative Societies and by officers or members of such societies. The concessions were sanctioned with a view to encourage the growth of the co-operative movement in its initial stages. The expression “on behalf of” in the notifications in question obviously cannot include documents executed in favour of co-operative societies by private parties ; and to exempt such documents would be in effect to extend the concession to persons who are not members of co-operative societies in cases where they happen to have transactions with such societies. The interpretation of the term “on behalf of” in the notifications as including also documents executed “in favour of” Co-operative Societies is incorrect. The Inspector-General of Registration is requested to issue forthwith necessary instructions in the matter to all Registering officers.

Government Order No. 1932-85—J. 137 of 02-03, dated 16th March 1904, prescribing certain rules to regulate the employment and remuneration of legal practitioners appearing on behalf |
|---|--|

Order No. R. 11306-26—St. 11-20-4, dated 11th April 1921.

In supersession of the Government Orders read above, Government are pleased to lay down the following instructions in regard to the action to be taken by Revenue Officers in the matter of "pauper suits" and for supervising the collection of the Stamp Duty awarded to Government in such suits:—

1. On receiving notice under Rule 6, Order XXXIII, of the Civil Procedure Code regarding an application to sue in *forma pauperis*, Deputy Commissioners should institute the necessary enquiries as to the real status of the applicant and should they feel satisfied that he is actually a pauper no action need be taken to dispute such application.

2. But if, on such enquiry, there appear to be circumstances in the applicant's case which *prima facie* disentitle him to sue as a pauper, the Deputy Commissioner may either in conjunction with the opponent or, independently of him, oppose the application. In the latter case he may engage the services of the Public Prosecutor or a local pleader.

3. When a person is permitted to sue as a pauper, it is not necessary that steps should be taken to watch the further proceedings in the case, but should circumstance subsequently come to light, which show that the indulgence granted to the plaintiff or appellant was one to which he was not entitled, the Deputy Commissioner will act in the manner described in Rule 2.

4. Rule 14, Order XXXIII of the Civil Procedure Code requires that in pauper suits the Court concerned shall forthwith send a copy of the decree to the Deputy Commissioner with a view to recover the institution fees due to Government in such cases.

5. On receipt of a copy of the decree from the Court it will be sent to the Amildar with instructions to ascertain in the first instance whether the party liable is able to pay. If he is able but fails to pay up the amount, the Public Prosecutor should at once be moved to apply by petition to the Court, under the Civil Procedure Code, to recover the amount by the attachment and sale of the party's property. The Deputy Commissioner should engage the services of the Public Prosecutor or any other local pleader to institute proceedings in the Court concerned for the recovery of the amount due.

6. When on enquiry it is found that the prospects of recovering the institution fees awarded in pauper suits are slender or when owing to lapse of time the claim has been extinguished, application should be made to the Government or the Commissioner of Stamps (in cases where the amount does not exceed Rs. 100) for sanction to write off the demand as irrecoverable. A separate application is not needed in each case.

No. R. 11306-26—ST. 11-20-4, DATED 11TH APRIL 1921.

All pending cases may be included in one statement in the form given in the annexure to this order and be submitted quarterly.

7. Deputy Commissioners are at liberty not to initiate proceedings for the recovery of the Stamp Duty in pauper suits in cases in which the collection of the amount cannot be effected without depriving the parties liable of the actual means of subsistence. Such amount may be dealt with as under para 3.

8. Quarterly returns in the form given in the annexure to this order showing the progress made in the collection of institution fees awarded to Government in pauper suits should be submitted by the Deputy Commissioners to the Stamp Commissioner. The returns should be despatched on or before the last day of the month following the quarter to which they relate. The Stamp Commissioner is requested to review every half-year the reports received from Deputy Commissioners, to forward a copy of the review to the Revenue Commissioner and to report the recoveries made every year under this head in the annual reports on the working of the Stamp Department.

Payment of Income Tax.

No. R. 11710-20—I. T. 5-20-42, DATED 22ND APRIL 1921.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE

GENERAL AND REVENUE DEPARTMENTS

READ—

Letter No. H. C. 82—20-21, dated 23rd December 1920, from the Commissioner of Income Tax in Mysore, submitting the copy of the form of chellan prescribed by the Government of India for remitting Income Tax collections to the Treasury and suggesting that the same form be adopted in Mysore also, the Collectors of Income Tax being held responsible for cash received by them in the same manner as in the other semi-commercial departments of Government

2. Letter No. H. C. 82-20-21, dated 4th January 1921, from the Commissioner of Income Tax in Mysore, explaining that the procedure in Madras of the payment of Income Tax collections to the Treasury by means of general chellan is very complex and involves much trouble on the assessee's inasmuch as they will be required to go first to the Collector's Office to obtain a chellan, then to the Treasury to remit the money and then again to the Collector's office to obtain the receipt in the prescribed form and that this method is not suited for adoption here as the Special Collector, Bangalore and Mysore Cities and the other Collectors are all touring officers and the handling of money by them would in addition to unnecessary changes in their tour programmes, involve the creation of costly establishments, etc., and suggesting that for the above reasons, the assessee may be permitted to pay the tax direct to the Treasury on triplicate chellans sent to them by the Collector's Office, the original being retained by the Treasury, the duplicate being handed over to the assessee, with the Treasury certificate and the triplicate forwarded by the receiving Treasury to the Collector concerned.

3. Letter No. H.C. 82—20-21, dated 3rd February 1921, from the Commissioner of Income Tax in Mysore, forwarding copy of letter No. I. C. 164—20-21, dated 24th January 1921, from the Deputy Commissioner, Kolar District, to the Commissioner of Income Tax, stating that pending final orders in the matter, he has issued instructions that assessee other than Government Officers, should pay the tax to the Collector of Income Tax within whose jurisdiction they reside to the credit of the Deputy Commissioner and that assessee who were Government Officers should pay the tax, other than that deducted at the source, to the Treasury from which they draw their salaries.

4. Note dated the 21st January 1921, by the Financial Secretary, stating that it is desirable to have the revenue properly classified in the Treasury accounts and that consequently chellans presented by assessee may be required to be passed by the Collectors before they are presented to the Treasuries.

Order No R. 11710-20—I T. 5-20-42, dated 22nd April 1921.

Government are of opinion that the classification of income-tax can be best done in the office of the Collector at the time the demand notices are issued as the Treasury will not be in a position to do this correctly.

As however the conversion of the Collector's Office into a receiving office means duplication of the Treasury staff, the proposal made does not commend itself to Government. The procedure in vogue in certain other Departments, *e. g.*, Excise and Judicial may be adopted in the Income Tax Department as well, by chellans being duly filled in and sent along with the demand notices to the assessee who will present the same with the money to the Treasury. The chellans will be in triplicate in the form appended to this Order.

READ—

Letter No. O. C. 152—L. B. 20-21, dated 7th December 1920, from the President, District Board, Shimoga District, submitting for sanction the resolution of the District Board to the effect that the contingent grant of each Vaidyasala may, if necessary, be increased up to Rs. 10 per mensem by the President of the District Board, after due enquiry in each case, on account of the prevailing high price of country herbs.

Order No. R. 11141-51—L. B. 43-20-9, dated 6th April 1921.

Government observe that the contribution paid by the Local Boards towards the Vaidyasalas is in the nature of a grant-in-aid which ought to be paid in lump and that enhancement now and then on account of individual items such as cost of herbs, pay of cooly, etc., is irregular. They accordingly direct that in the case of existing institutions, the District Boards may, on the merits of each case, raise the grant by Rs. 10 per mensem, subject to the condition that the total grant in each case including that from the Municipality, if any, should not exceed Rs. 50 per mensem.

2. Rule 7 of the Rules issued under Government Order No. R. 7528-36—L. B. 19-19-41, dated 30th December 1920, will be modified accordingly.

**Expenditure in connection with
the Experimental use of Musto's
Well-boring Plant.**

No. R. 11131-40—L. B. 50-20-22, DATED 6TH APRIL 1921.

**PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.**

GENERAL AND REVENUE DEPARTMENTS.

READ—

Letter No. L. F. O. C. 854—19-20, dated 7th—9th August 1920, from the President, District Board, Tumkur, reporting on the working of the Musto's Well-boring Plant and requesting instructions as to how the charges of experimenting with the said plant are to be met—whether wholly by Government or partly by Government and partly by the raiyats of the village where the plant will be used etc.

2. Circular No. 4296-303—L. B. 50-20-2, dated 24th September 1920, from Government, requesting the Deputy Commissioners of Districts to submit a report on the working of the Musto's Well-boring Plant.

3. The replies received from the Deputy Commissioners on the subject.

Order No. R. 11131-40—L. B. 50-20-22, dated 6th April 1921.

From the reports received it is observed that the District Board of Bangalore, Kadur, Kolar and Hassan have not purchased the boring plant, while the remaining four District Boards, *viz.*, Mysore, Chitaldrug, Shimoga and Tumkur are using it as a purely experimental measure in a few selected places. The question is raised by the Deputy Commissioner, Tumkur District, as to how the cost of these experiments is to be met. Government consider that the use of the plant being still in an experimental stage, it would not be proper to levy any contribution for its use from the raiyats and accordingly direct that the cost may be met from the Drinking Water Wells Fund in all cases where the plant has been used or will be used in future; when, however, the plant has been proved to be a success the expenditure on account of its use may be provided for in the original estimate and the proportionate contribution therefore recovered from the raiyats in cases where such contribution has to be levied under the rules.

Absence of the *Ex-officio* President
of the District Board.

No. R. 11113-20—L. B. 4-19-98, DATED 6TH APRIL 1921.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS

READ—

Revenue Secretary's letter No. R. 12639—L. B. 4-19-88, dated 3rd May 1920, to the Deputy Commissioner, Hassan District, informing him that, under the authority of Sections 6 and 9 of the Land Revenue Code and Notification No. R. 4156—L. B. 56-19-1, dated 24th September 1919, the Senior Assistant Commissioner who was in charge of the Revenue Administration of the District, was during the absence of the permanent Deputy Commissioner on leave, competent to preside at the Hassan District Board Meeting of the 3rd January 1920.

No. R. 11113-20—L. B. 4-19-98, dated 6th April 1921.

On a further consideration of the question, Government are of opinion that rule III (2) (c) of the rules issued under Section 37 of the Local Boards and Village Panchayet Regulation clearly lays down as one of the duties of the Vice-President that he should, pending the succession, appointment or election of a President or during the absence of the President on leave, exercise the powers or perform the duties of the President. This rule has the force of law and it should, in supersession of the instructions conveyed in the letter read above be followed in all such cases. The provision in Section 9 of the Land Revenue Code for the temporary succession to the Revenue duties of a Deputy Commissioner should not be construed as authorising the Officer temporarily in charge of the District to preside at the meetings of District Board during the absence of the permanent incumbent on leave.

THE MAHARAJA OF MYSORE.**

GENERAL AND REVENUE DEPARTMENTS

READ AGAIN—

Government Order No. 11541-50—L. F. 26-96, dated 14th April 1899, laying down certain conditions for the grant of loans to Municipalities for the execution of sanitary works.

Order No. R. 11030-41—ML. 201-20-1, dated 4th April 1921.

Having regard to the present conditions of the money market and the ruling rate of interest, Government consider that it is necessary to raise the rate of interest charged on the several classes of loans granted by them. So far as loans to Local Bodies are concerned, Government are pleased to direct that the rates of interest on them be fixed at 7 per cent, ordinary, and 9 per cent penal, and that, as regards loans already advanced, the penal rate be enhanced from 6 per cent the present rate, to 9 per cent, if defaults have been made in repayment, unless a definite penal rate has been specifically fixed in the agreement itself relating to the loan in question.

Taxes on Timber Depots

No. R. 11960-74—ML. 81-20-8, DATED 29TH APRIL 1921.

**PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.**

GENERAL AND REVENUE DEPARTMENTS.

READ AGAIN—

Government Order No. R. 1696-809—ML. 81-20-1, dated 2nd August 1920, directing that the Sandalwood Oil and other Government factories and the Electric Power and Transformer Houses of the Electric Department which are being worked on a *quasi* commercial basis should pay taxes to the Municipalities concerned.

2. Letter No. C. 989—L. B. 20-21, dated 22nd January 1921, from the Deputy Commissioner, Shimoga District, soliciting instructions as to whether the Sandal Koties and the Timber Depots of the Forest Department located within the limits of a Municipality are liable to payment of Municipal taxes.

3. Correspondence ending with letter No. 509, dated 21st February 1921, from the Conservator of Forests, opening that the Sandal Koties and Timber Depots are not liable to payment of Municipal-taxes.

No. R. 11960-74—ML. 81-20-8, dated 29th April 1921.

Government observe that a differentiation has to be made between Sandal Koties and Timber Depots. The former are now only Depots for stocking and not so much for sale, while the latter are mainly kept for purposes of sale. Government therefore direct that Municipal taxes be levied on the Timber Depots but not on the Sandalwood Depots so long as the latter are used mainly for purposes of stocking wood, the property of Government.

Foreign Scholarships and Deputations.

No. 9350-410—Edn. 60-20-116, DATED 2ND APRIL 1921.

**PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.**

GENERAL AND REVENUE DEPARTMENTS

READ—

Government Order No. 11121-94—Edn. 5-19-119, dated 25th May 1920, passing orders revising the scheme of foreign scholarships and deputations.

2. Government Order No. G. 7350-410—G. M. 100-20-1, dated 2nd October 1920, directing that in regard to departmental deputations proposals should be submitted before the 15th February every year.

3. Letter No. H. C. 432 of 19-20-21, dated 9th February 1921, from the Inspector-General of Education in Mysore, suggesting that applications for foreign scholarships and deputations be invited in the month of August every year.

Order No. 9350-410—Edn. 60-20-116, dated 2nd April 1921.

The Inspector-General of Education states that the academical year begins in October in western countries and that the present system under which the scholarships and deputations are awarded after September hardly leaves any time for taking the necessary security from the candidates and making arrangements for their study. He has in the foregoing circumstances proposed that applications may be invited in the month of August so that orders may be passed about the month of October and necessary arrangements made before May of the following year to enable the scholars to leave for their place of study well in time before the commencement of the term.

2. The proposals of the Inspector-General of Education are approved, and the Government Order dated 2nd October 1920, will be modified accordingly.

Report on the Progress of Education in Mysore.

No. 10200-60—Edn. 20-20-24, DATED 23RD APRIL 1921.

**PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.**

GENERAL AND REVENUE DEPARTMENTS.

READ—

The Report on the Progress of Education in Mysore during the year 1919-20.

Order No. 10200-60—Edn. 20-20-24, dated 23rd April 1921.

Recorded.

There has been considerable delay in the submission of the report for which no explanation has been offered.

2. *Educational Statistics.*—Education in the State which had suffered of late owing to the adverse economic conditions due to the late war and the prevalence of epidemics has been showing signs of recovery. There has been some increase in the enrolment and attendance of pupils in all public institutions, though the standard of progress attained in 1917-18 has yet to be regained. During the year under report, the number of public institutions decreased by 159, but their strength increased to 328,290, *i. e.*, 5,548 more than in the previous year, but still 10,582 less than in the year 1917-18.

The following statement indicates the progress of education during the year 1919-20 as compared with the previous two years:—

	1917-18	1918-19	1919-20
1. Number of institutions ...	9633	10,500	10,341
2. Strength ...	338872	32,2742	32,8790
3. Percentage of boys at school to male population of school-going age ...	68'00	65'70	65'00
4. Percentage of girls at school to female population of school-going age ...	14'20	12'26	13'85
5. Expenditure on public institutions...	Rs. 31,43,346	38,51,390	41,65,137
6. Average cost of education per head of population ...	Rs. 0-8-9	0-10-9	0-11-8
7. Proportion of area to each school...	1 for 2½ square miles	1 for 2½ square miles	
8. Total grant-in-aid ...	Rs. 4,54,770	5,02,399	4,69,795
9. Proportion of pupils to population	1 in 16	1 in 17	1 in 17

3. *Expenditure.*—The total expenditure on public institutions from all sources amounted to Rs. 41,65,137 showing an increase of Rs. 3,13,747 over that of previous year. Of this amount Rs. 20,72,017 were spent on Government Institutions, Rs. 5,682 on Municipal Schools, Rs. 6,87,236 on aided institutions, Rs. 4,39,304 on buildings and furniture, and Rs. 9,60,803 on other items. The amounts spent during 1918-19 on Government and Aided Institutions were Rs. 16,89,298 and Rs. 7,22,650 respectively.

The total fee-income decreased from Rs. 3,88,959 to Rs. 3,72,83½. The fall which is specially noticeable in the case of Anglo-Vernacular Schools in spite of the increase in the number and strength of these schools calls for explanation.

4. *Administrative Improvements.*—With a view to facilitate prompt despatch of work in the department the Inspector-General of Education in Mysore was invested with powers as regards the appointment of additional teachers in Anglo-Vernacular Schools, the strengthening of staff of existing schools, etc., and the powers of the Inspecting Officers and Head Masters of High Schools were also enhanced in the matter of appointments, grant of leave to subordinate offices, etc. The scheme of a separate Inspectorate for girls' schools was brought into operation.

As the Inspecting Staff of Hindustani Schools was found inadequate, the appointment of an additional Inspector was sanctioned and the territorial distribution of work among the Inspecting Staff of these schools was revised.

A staff of relieving teachers was also sanctioned for the High Schools and the Hindustani Schools for serving as a reserve in the case of short vacancies.

10200-60—EDN. 20-20-24, DATED 23RD APRIL 1921.

Among other measures sanctioned during the year were the issue of rules to regulate recognition of schools, the revision of rules and syllabuses for Commercial Schools and Examinations and the revision of rules regarding Foreign Scholarships and Deputations.

5. *Inspection*.—The Inspector-General of Education was on tour for 59 days and visited only 20 schools. Government recognise the limitations on the time available to the Inspector-General for touring in view of the heavy work of consolidation and direction of the activities of the Department, but they consider that more itineration and inspection by him are possible and necessary. Now that most of the larger questions connected with education in the State have been examined, he should be able to spend a considerably longer time on this part of his work.

The Deputy Inspector-General of Education is reported to have inspected only 4 institutions and it has not been stated of what grade these institutions were. Under the Government Order creating the post of the Deputy Inspector-General it is one of the principal duties of this Officer to make a detailed inspection of all the High Schools in the State once a year, but this has not been attended to.

Information has not been furnished about the work done by the Technical Assistant in inspecting the large number of school buildings under construction by the department.

The Circle Inspectors of Bangalore and Mysore inspected 299 and 365 schools respectively. Except in the case of the Inspectors of Bangalore, Mysore and Tumkur, the itineration of the District Inspectors has fallen short of the prescribed minimum. The itineration and inspection of the Assistant Inspectors are reported to have been better than last year. Further information is however necessary to enable Government to judge how far this work of the subordinate Inspecting Staff has been satisfactory. The Inspector-General is therefore requested to furnish information in his future reports as regards the number of institutions under the charge of each Officer, the number inspected by him and the number remaining uninspected at the end of the year.

Government note with satisfaction that the scheme of the separate inspectorate for girls' schools has been working satisfactorily.

6. *Collegiate Education*.—The demand for Collegiate Education has been steadily on the increase. The number of pupils taking up Science as an optional subject is also rapidly increasing. The Collegiate High School, Bangalore, provides accommodation for 385 pupils in 7 sections. Great difficulty was felt in providing accommodation for the large number of pupils taking up Science as an optional subject. Arrangements were made for the practical work of the Entrance classes in Physics and Chemistry in the Central College as in the previous years. As this arrangement had certain disadvantages, the construction of a Science Hall for the Bangalore Collegiate High School was ordered to be taken up immediately. To provide Science for a Section of the Entrance Class in the Malnad, Government have sanctioned the opening of an Entrance Class in Science in Shimoga High School in July 1921. Necessary facilities were also given to the London Mission High School where an Entrance Class in Science has been opened in the current year. The work of the Entrance Classes during the year under report was satisfactory. Out of 887 candidates sent up for the examination 420 or 47.35 per cent were successful.

7. *High Schools*.—There were 11 Government and 6 aided English High Schools for boys with a strength of 2,894 and 3,299 respectively or a total strength of 6,193 which was in excess of the strength in the previous year by 394. Additional Katcha buildings were constructed at certain centres to relieve the difficulty in finding accommodation. With a view to provide adequate facilities for the teaching of Science a scheme of constructing Science Halls for all High Schools was sanctioned and ordered to be taken up according to a programme extending over a few years.

In several of the Government High Schools the results in the Secondary School Leaving Certificate Examination were not satisfactory. The percentage of pupils declared eligible for College Course was below 40 per cent in the Government High Schools at Bangalore, Channarayana, Hassan and Kolar. There is need for improving the efficiency of the Government Schools and the work of the schools requires constant supervision and inspection by higher officers.

No. 10200-60--EDN. 20-20-24, DATED 23RD APRIL 1921.

The Kannada High Schools have not been popular, their strength having gone down from 336 to 245. Owing to the limited prospects of pupils who pass the Kannada Upper Secondary Examination and the existence of a large number of English High Schools affording higher education, the Kannada High Schools do not serve much useful purpose. The Upper Secondary Classes in four institutions have been abolished and the question of reducing their number further is under consideration.

8. *Anglo-Vernacular Schools.*—Anglo-Vernacular Middle Schools continued to increase in popularity. The number of Middle Schools rose from 360 to 377 and their strength from 49,647 to 52,656. Of these 140 were fully developed Anglo-Vernacular Schools and 129 were Rural Anglo-Vernacular Schools, *i. e.* Vernacular Middle Schools with special aided English Classes. It is reported that there is great congestion in a large number of Middle Schools and that the problem of finding additional accommodation and opening new schools has become urgent. The questions of increasing the number of Middle Schools and their proper redistribution are under consideration of Government in connection with the Memorandum on Education.

9. *Primary Schools.*—There was a fall in the number of Primary Schools from 8,966 to 8,806 but their strength rose, though very slightly, from 2,19,797 to 2,20,201. The scheme of compulsory education is in force in all the 240 centres to which it has been extended by notification. Nine thousand three hundred and seventy-nine boys and 2,188 girls of compulsory age were admitted during the year, 2,807 warnings were issued and 116 prosecutions instituted.

10. *Training Institutions.*—The strength of all the Training Institutions was 586 as against 537 in the previous year. The fall is specially noticeable in the case of training institutions for women, their strength having fallen from 101 to 63. Government have recently passed orders regarding the measures to be taken for increasing the supply of women teachers and also for the training of a large number of men teachers. The steps to be taken for training a still larger number to meet departmental requirements consequent on the reforms to be introduced will be dealt with in the general resolution which Government propose to issue on the Education Memorandum.

11. *Industrial Schools.*—Despite the decline in the strength of the Industrial Schools from 1,640 in the year 1918-19 to 1,410 in the year under report, the schools are reported to have worked satisfactorily. The fall in the strength has been explained to be due to the stipends provided in these institutions having lost much of their attraction in view of the increased wages the pupils are able to earn elsewhere and the absence of any legislative enactment for enforcing continuance of the pupils in schools till the completion of their training. Government have under consideration the question of replacing the scheme of stipends by a system of payment of wages, whereby each boy will be given wages instead of fixed rates of stipends. The question of introducing an Apprenticeship Act is also under consideration.

12. *Education of Women.*—The progress of women's education continues to be slow. The percentage of girls at school to girls of school-going age has increased from 12.27 to 13.55. The number of school for girls increased from 737 to 765 and their strength from 49,631 to 56,007. There were 146 girls in High Schools, 2,3847 in Middle Schools and 53,477 in Primary Schools. There were in addition 2,65 girls in special private schools. The total expenditure on the education of women during the year was Rs. 4,53,402-8-6.

13. *Education of Special Communities.*—The number of Mahomedan boys and girls at school rose from 30,472 and 8,449 in the previous year to 31,158 and 10,829 respectively, but the percentage of pupils reaching higher stages has not however shown any improvement. The Inspectorate for Hindustani Schools has been strengthened so as to ensure better and more frequent inspection of these schools.

The education of the Depressed Classes has been receiving the earnest consideration of Government. Orders were issued in April 1920 regarding the policy to be followed in the development of Education among these classes. The allotment for scholarships to the Depressed Classes has been increased to Rs. 25,000 of which Rs. 10,000 has been reserved for students in the Anglo-Vernacular Classes. As a result of the special facilities afforded by Government to members of this community and the

No. 10200-60—EDN. 20-20-24, DATED 23RD APRIL 1921.

policy of Government in throwing open public institutions to all classes the number of Panchama pupils at school increased to 16,896 during the year of whom as many as 3,144 were in institutions other than the schools maintained exclusively for Panchamas. A Special Committee has been constituted for the advancement of the Depressed Classes and the question of improving the existing Panchama Boarding Institutions; opening additional Boarding Anglo-Vernacular Schools and opening a large number of primary schools is under the consideration of Government.

14. *Co-operation of the Public.*—It is gratifying to note that the interest of the public in educational matters was continued and liberal contributions have been made by several persons, among whom Messrs. Chan nabasappa of Kabbahalli in Gundlupet Taluk and Nanjegowda of Kantarajapura in the Channarayapatna Taluk are deserving of special mention.

15. *General.*—The expenditure on education has considerably increased of late, the average cost per head of population having risen from five annas six pies in 1910-11 to eleven annas eight pies in 1919-20 and the further expansion of educational facilities in all grades foreshadowed in the Memorandum on Education involves heavy additional expenditure which in view of the present financial situation cannot be met from the available sources of revenue. The question therefore of finding ways and means for meeting the increased expenditure is one of urgency but is beset with difficulties. The matter has been engaging the earnest consideration of Government and they propose to discuss this question in detail in the resolution on the Memorandum on Education.

Government are glad to note that the work of the Department during the year showed advance in several directions but realise that pending the issue of orders laying down future policy, the department has been in a state of suspense which has precluded a vigorous policy being pursued. It is hoped however that when such orders are issued the administration of the department will show progress and advance in all directions in the coming years.

**PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE**

GENERAL AND REVENUE DEPARTMENTS

READ—

Correspondence ending with letter No. 3405—C. 205-7, dated 3rd November 1920 from the Director of Agriculture in Mysore, forwarding copies of the Report of the Agricultural Department for the year 1919-20.

Order No. 9801-60—A. & E. 102-20-6, dated 14th April 1921.

Staff.—Dr. Coleman was in charge of the department from the 9th August 1911 when Mr. H. V. Krishnayya, who officiated as Director, handed over charge. Dr. B. Narasimha Iyengar was appointed Agricultural Chemist on his return from Germany after undergoing training there. Recognising the necessity of training some more officers of the Agricultural Department in foreign countries, Government have sent out Mr. Venkata Rao, Senior Assistant Mycologist, and Mr. Kunhi Kannan Senior Assistant Entomologist, the former to England with a State scholarship and the latter to America and other places on deputation. With a view to promote the development of live stock in Mysore, Mr. W. Davison, B.S.A., has been appointed Live Stock Expert.

Dr. Coleman inspected all the farms, the Agricultural Schools at Hebbal, Chik kanahalli, and Hunsumaranahalli, the Offices of the Deputy Director and the Assistant Director and Offices of some of the Agricultural Inspectors. The Director was on tour for 95 days as against 80 days last year, the Deputy and the Assistant Directors toured 168 days and 201 days respectively against 182 and 183 days in the previous year.

Library.—The number of books in the Library has increased from 4,700 to 4850. The Library continued to subscribe to the usual number of periodicals, 75 in number in addition to 3 journals relating to live stock. Subscription was renewed for 17 German periodicals which had been discontinued owing to the European War. Besides, a large number of bulletins is purchased and also got by way of exchange. The Director has been requested to submit proposals for encouraging the use of the Library by the public, and constituting a section of his office to serve as a Bureau of Agricultural information. These proposals should be expedited.

AGRICULTURAL FARMS, EXPERIMENTAL WORK.

Hebbal Farm.—Among the crops that were tested on the Hebbal Farm ragi paddy and sugar-cane were, as during the last year, the chief ones. The rotation of ragi with groundnut and leguminous crops, the transplantation of ragi instead of broad casting, its wider spacing, the intercultivating of crops by the kunte, and the selection of ragi for seed, were all tested, and better yields were obtained. The effect of green manure on ragi was not satisfactory owing to the fact that the crop was sown very late and was subject to unsuitable weather conditions during its period of growth. Of the Hebbal selections of ragi which were tried on a field-scale H and H₂₂ were found to be the best yielders. With regard to paddy the tests were conducted on the same lines as those of last year and results have confirmed those obtained last year. Of the varieties of sugar-cane in respect of which experiment were conducted 'Red Mauritius' has as usual yielded the best outturn but it is reported that no definite opinion can be given as the merit of the new varieties under observation until they are tested on a larger scale.

No. 9801-60—A. & E. 102-20-6, DATED 14TH APRIL 1921

Marthur Farm.—Experiments were conducted in connection with paddy, sugar-cane, areca, ragi and other minor crops with satisfactory results. In the last year's review on the Report of the Department, Government have referred to the desirability of popularising the cultivation of pepper in the Malnad area out of cuttings obtained from the Madras Government Farm at Taliparamba. Government will be glad to know the progress made in this direction.

Babbur Farm.—Dry crops, such as cotton and jola, and irrigated crops such as sugar-cane were the main crops that were grown in the Farm. Doddahatti yielded a better outturn than Sannahatti and the yield of jola was 160 seers per acre as against 119 seers per acre last year. Better methods of cultivation of ragi produced valuable results. Of the four kinds of jaggery boiling furnaces that were studied Babbur Megasse furnace has been found not only to save fuel but also to produce a better quality of jaggery with a low percentage of non-crystallisable sugar. The Indian Sugar Committee paid a visit to the Farm.

Nagenahalli Farm.—The cultivation of sugar-cane for the development of which the farm has been started could not be taken up during the year under review on account of the fact that sufficient supply of water could not be assured owing to the costly improvements required along the route of the main channel. Other crops, such as paddy, jola, etc., were grown with poor results. The receipts and expenditure of the farm amounted to Rs. 1,858 and Rs. 7,900 respectively. Arrangements having now been made for a satisfactory supply of water, the Department should be able to undertake experiments on sugar-cane.

Investigations.—The results of the investigation carried on in the scientific section of the Department were of a valuable character. The results of the previous year's work in regard to green manuring and liming were on the whole confirmed. Twenty-three samples of oil-seeds were analysed with regard to their oil contents : gingelly and castor showed a variation of over 20 per cent.

Investigations in progress.—Breeding work was conducted on ragi, sugar-cane and cotton. H₂₂ ragi gave a heavier yield and some of the other selections are likely to be heavy-yielders also. Further investigations are in progress in the matter.

With regard to sugar-cane, Red Mauritius has as usual proved a heavy yielder. A large number of seedling canes were tested and they promise to do better. It is reported that no recommendations as to the cultivation of these canes on a large scale could be made by the Department until after the milling season as final results had to be awaited.

Government note that experimental work on cotton is being carried on in close co-operation with the Bombay and the Madras Department of Agriculture. The Director reports that conditions with regard to the growth of Doddahatti-Dharwar-American were not found to be favourable at Babbur and that the work had therefore to be transferred to the vicinity of Banavara where it is now being conducted on privately owned land and that it will be necessary to buy or lease a small plot of land for this purpose. Detailed proposals indicating the extent of land required, and the cost involved, etc., may be submitted for the orders of Government.

The composition of nineteen samples of fodder grasses and two samples of ragi straw was determined. The digestive co-efficients have to be determined in order to find out the fodder value. This is being investigated now. Twenty-four samples of soils from Marthur and Babbur Farms were analysed. Manurial experiments are in progress with reference to the results of these analyses. Potculture work is being pursued by Dr. Narasimha Iyengar, and interesting results have already been obtained with regard to the water requirements of ragi and jola. Large grants have recently been sanctioned by Government for repairing and suitably equipping the Potculture house. It is hoped that with these facilities as they are afforded continuous efforts will be made to achieve valuable results. Government note that a beginning has been made in investigating the possibilities of agriculture in Mysore.

Popularisation of improvements.—In spite of the difficulty in securing an adequate supply of improved implements the total cost of implements issued from the Central Depot amounted to Rs. 40,812 as against Rs. 38,206 in the previous year, implements to the value of Rs. 1,800 being sold under the hire-purchase system. It

No. 9801-60—A. & E. 102-20-6, DATED 14TH APRIL 1921.

is also reported that 40 ploughs of a new model, designed by the Department have been given out for trial to responsible Agriculturists. Thirty-six thousand eight hundred and fifteen seers of ragi of an improved strain, 72,210 seers of seed paddy and 536,670 sets of sugar-cane were distributed during the year under review. Sixty-nine tons of oil-cakes and a large quantity of special paddy-manure were also distributed.

It is satisfactory to note that the improved methods of threshing by stone-roller and of sugar-cane milling and jaggery boiling have become popular in the Eastern Division. Government also note that a large area of the black cotton soil is being brought under mulberry cultivation in order to increase the output of Mysore silk.

Work of the Department in conjunction with the Co-operative Societies.—In view of the difficulty of getting adequate supply of sound ragi suitable for seed, two special Co-operative Societies have been formed to grow this kind of ragi and distribute the seed.

The existing credit Co-operative Societies have also undertaken this work. Fifty Societies in the Eastern Division have begun to stock and sell seeds, implements and manures as against nineteen in the previous year.

Agricultural Engineer.—The Agricultural Engineer continued to be in charge of building works in the various Farms. The jaggery-boiling furnace at Hebbal and Babbur Farms were improved. The Agricultural Engineer designed, with the aid of the special temporary establishment sanctioned by Government, a new plough adapted to local conditions and forty of these ploughs were manufactured and distributed over the State for trial and report. Government await the results of the trial with these new ploughs.

The Destructive Insects and Pests Regulation.—Spraying operations for the eradication of *Koleroga* of areca palm were resorted to in the places which were affected by this disease. The work was, however, handicapped owing to the want of a sufficient number of sprayers. Government are glad to note that through the Co-operation of some gardeners who readily placed their sprayers at the disposal of their neighbouring gardeners, it was possible to bring about 300 acres under operation. Two villages were brought under the scope of the Regulation but no coercive measures were found to be necessary.

KAMBLIHULA work was conducted on the same lines as in previous years. Satisfactory results are reported to have been achieved wherever this work has been in progress for several years.

LIVE-STOCK.

Mr. Davison, the Live Stock Expert, was in charge of the Gottigere Sheep Farm and the Hebbal Dairy Farm. Unsuitable stock in the Sheep Farm were sold and replaced by 100 ewes drawn from Mysore and Kolar Districts. Orders have been placed for two more Merino rams.

In the Dairy Farm, poor milkers and unpromising calves were disposed of by sale and good cows were purchased.

Agricultural Education.—In the year under report, there were 19 students in the Hebbal School of whom eleven were in the first year and eight in the second year classes. All the second year students sat for the final examination and were declared to have passed. The entrance requirements for the English course have been raised, and the length of the course extended to three years. The junior students devoted much attention to the growing of a variety of crops for observation purposes, the entire cultivation being done by themselves. An orchard has been formed and a portion of the area has been planted with various kinds of fruit plants. The books in the School Library increased from 150 to 200.

Chikkanahalli School.—This vernacular Agricultural School does not only impart Agricultural Education to raiyats' sons but it also sells implements, seeds and manure and does demonstration work to an appreciable extent. There were 14 boys in the school. All of them sat for the final examination and were declared to have passed. At the instance of the Director, the number of scholarships was increased from 10 to 15.

NO 9801-60; A. & F. 102-20-6, DATED 14TH APRIL 1921.

Government are pleased to remark that the work of the department under the able and enthusiastic guidance of Dr. Coleman during the period under report has been satisfactory. Government hope that with the expansion of its sphere of operations and also the strengthening of the subordinate staff, recently sanctioned, the Department of Agriculture will get into even closer touch with the raiyat population and serve to increase the Agricultural production of the State in as large a measure as possible.

Report on the working of the Co-operative Societies in Mysore for 1919-20.

No. 10440-99—E. C. 70-20-5, DATED 30TH APRIL 1921.

**PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.**

GENERAL AND REVENUE DEPARTMENTS.

READ—

Letter No. 2221, dated the 13th October 1920, from the Registrar of Co-operative Societies in Mysore, submitting Imperial Statements forming the appendices to the Report on the working of the Co-operative Societies in Mysore for 1919-20.

2. Correspondence ending with letter No. 3797, dated the 25th January 1921, from the same officer, submitting the annual report on the working of Co-operative Societies in Mysore, during the year 1919-20.

Order No. 10440-99—E. C. 70-20-5, dated 30th April 1921.

Mr. R. Ranga Rao, B.A., B.L., continued to officiate as Registrar till the 24th November 1919, when he was confirmed in that appointment. Messrs. Abdul Azeez Khan, B.A. and K. Subba Rao, B.A., LL.B., were placed in charge of the duties of Assistant Registrar for the Mysore and Shimoga Divisions respectively. Mr. P. A. Krishnaswami Iyer continued to be the Personal Assistant to the Registrar.

The re-organisation of the department sanctioned in 1918 was brought fully into effect during the year. The office of an Assistant Registrar was opened at Mysore City with jurisdiction extending over the Districts of Mysore, Bangalore and Hassan. Another office of Assistant Registrar was opened at Shimoga with jurisdiction over Shimoga, Kadur, Chitaldrug and Tumkur Districts. An adequate staff of clerks and menials was provided for the officers referred to out of the staff of the Registrar's Office. The number of Inspectors at the end of the year was 42 as against 36, and of clerks 26 as against 25 during the previous year. The system of confining Inspectors to particular items of work in order to afford scope for specialisation was continued during the year. The special Technical Inspector for the technical supervision of Weavers' Societies joined duty in January 1920, and two Inspectors were sanctioned as a temporary measure for work relating to Agricultural Co-operation.

Development of Co-operation.—The total number of Co-operative Societies in the State increased from 1233 in 1918-19 to 1402 in 1919-20. One hundred and ninety-four Societies were registered during the year while the registration of 25 societies was cancelled. Of the new societies registered, 42 were for the development of Agricultural Co-operation, 8 for Industrial Co-operation, 19 were stores, 36 were grain banks, 12 were for the exclusive benefit of the Depressed Classes, one was a house-building society and the rest were credit societies.

The membership in all the societies increased from 84,425 in 1918-19 to 92,679 in 1919-20. The Bangalore District as usual had the largest membership and the Kadur District the smallest, and there was an increase in the membership in all districts except Shimoga in which there was a fall of about 5·8 per cent.

Working capital.—The total working capital increased from Rs. 70,98,327 in 1918-19 to Rs. 78,00,100 in 1919-20. The Bangalore District contributed the largest proportion of working capital and Chitaldrug the least. All districts excepting Shimoga and Chitaldrug showed an increase. The average working capital per member rose from Rs. 84·1 to 86·3 during the year.

Deposits.—The deposits attracted by Co-operative Societies amounted to Rs. 53,85,704 during the year as against Rs. 31,50,040 in the previous year. This is a very encouraging feature. The total amount of deposits outstanding at the end of the year was Rs. 27,76,066 as against Rs. 24,16,125 at the end of the last year, the percentage of increase being 14·9.

No. 10440-99—E. C. 70-20-5, DATED 30TH APRIL 1921.

In spite of a special circle having been formed for the western division and placed in charge of an Assistant Registrar the progress of the Co-operative movement in the districts of Shimoga and Chitaldrug continued to be poor, the working capital and the deposits in both having gone down instead of showing an increase. This requires careful investigation and attention.

Profits made by societies.—The total profit realised by all the Co-operative Societies during the year was Rs. 8,00,692 as against Rs. 6,69,063 during the previous year. The total transactions increased from Rs. 242·31 lakhs to Rs. 326·25 lakhs or by 34 per cent. The total amount of loans issued during the year by all the Co-operative Societies was Rs. 63,05,085 in 138,828 cases as against Rs. 54,25,073 in 88,947 cases. There was thus a considerable increase in the total number of loans over those of the previous year. It is gratifying to note that steady attempts are being made to put down the practice of a few influential members in some societies monopolising all the loans for themselves.

Societies for depressed classes.—The number of societies for depressed classes increased from 22 to 29, while some of the existing societies also encouraged the admission of depressed classes into their membership. There is still considerable scope for the encouragement of Co-operative effort among these classes, and Government trust that in the coming year better progress may be possible.

Co-operation in malnad for the benefit of areca growers.—The Registrar reports that the areca growers of the malnad are heavily burdened with debt and that the possibility of forming societies for their benefit was examined by him during the year. It is stated that arrangements have been made for forming a few test societies for areca growers. Government await the results of the experiment with very great interest.

Co-operative Banking.—The Bangalore Central Co-operative Bank and the Mysore Provincial Co-operative Bank continued to be the two principal central financing institutions in the State, and work in both the institutions was efficient throughout.

In addition to the two District Central Banks at Mysore and Shimoga, one more was formed during the year, the Federal Banking Union at Hassan having been converted into a District Central Bank.

Agricultural and Industrial Co-operation.—The number of Agricultural Societies is reported to have increased from 1,030 to 1,162. Their membership increased from 47,860 to 51,942, and their working capital from Rs. 23,82,957 to Rs. 23,83,447. The number of stores societies increased from 39 to 60, and their membership from 9,000 to 10,000. The value of articles purchased by them during the year amounted to 11 lakhs, and the value of articles sold to Rs. 11·96 lakhs, as against Rs. 5·8 lakhs and Rs. 5·7 lakhs respectively during the previous year. The Registrar reports that the usefulness of Co-operative Societies as an agency for the distribution of food stuffs was demonstrated strikingly during the year under report. Two hundred societies undertook the sale of rice during the year. As a result of experience gained in the distribution of rice through the Co-operative Societies, it has been arranged to utilise them as centres for distribution of fuel in the Bangalore City. As regards Agricultural and Industrial Co-operation, Government expect that with the staff already sanctioned more useful and substantial work will be done in future. It is gratifying to note that several societies have held demonstrations of improved ploughs, seed drills, cultivators, disc harrows and threshing machines, under the guidance of a Demonstrator, specially deputed by the Director of Agriculture for the purpose. Of the two lift-irrigation societies only one is reported to have been working in the year. The Dairy Society formed at Mandya about five years ago is reported to have shewn no desire to start work, but the one at Hebbal formed during the year under report has worked very successfully. Efforts are being made to start a Milk Supply Society for the Bangalore City. Forty Weavers' Co-operative Societies are reported to have been working at the end of the year with a membership of 1900 and a working capital of Rs. 1,37,630. They sold raw materials to the extent of Rs. 2,67,000 and finished products to the extent of Rs. 2,12,000. Out of the sum of Rs. 50,000 placed at his disposal for advancing loans to these societies, the Registrar sanctioned loans amounting to Rs. 18,500 to three societies.

No. 10440-99—E. C. 70-20-5, DATED 30TH APRIL 1921.

The Bangalore City Weavers' Co-operative Society is reported to have dealt with the largest number of weavers. The Bank of Mysore granted a cash credit of Rs. 50,000 to the society during the first half-year, but owing to the stringency of the money market the Bank was compelled to reduce the limit of cash-credit to Rs. 20,000 during the second half of the year. To supplement the working capital of the society, the Government sanctioned an advance of Rs. 15,000 to the society to be utilised until such time as the Mysore Bank was able to raise its cash-credit. The membership of the society is reported to have increased from 197 to 247 and its share capital from Rs. 5,280 to Rs. 10,988. It purchased raw materials to the extent of Rs. 10,636, and sold them to the extent of Rs. 11,741. The net profits of the society are reported to have amounted to Rs. 4,968 as against Rs. 2,518 in the previous year. The society has also helped in the distribution of rice to the value of Rs. 13,000.

Out of 4 Sericulturists' Societies in the beginning of the year, the one at Siddlaghatta is reported to have done some work in the way of supplying disease-free eggs to its members.

Jaggory manufacturing Societies have proved a failure, and rice-hulling Societies also have generally ended in failure excepting the one at Channarayapatna. Owing to the abnormal increase in the price of fuel and its scarcity in and around Channarayapatna, the Society has found the cost of working the mill prohibitive. Government note that arrangements are being made by the Director of Industries and Commerce for replacing the steam engine and boiler by an oil-engine. A special report should be submitted to Government as to how far this work has progressed and how the Society is at present working. Of the two Gudigars' Societies, the Sagar Society is reported to have been doing good work.

An Oil-mongers' Society is reported to have been formed at Belur for the purchase of oil-seeds and the manufacture of pure oil. A society for improving Home Industries is said to have been formed by the lady teachers and students of the Vani Vilas High School, Bangalore.

Disposal of suits and audit of accounts.—At the beginning of the year there were 858 suits pending disposal, during the year 1541 fresh suits were entertained making a total of 2,399 for the year. The increase in the number of suits is reported to be due mainly to the increased attention paid by the department to the consolidation of societies. The Registrar reports that out of 2,399 suits, 1,109 were disposed of during the year, leaving so large a number as 1,290 undisposed of. The number of decrees pending execution with the Deputy Commissioners at the beginning of the year was 878 and 762 more were sent to them for execution during the course of the year, thus making a total of 1,640. Out of these, 333 were executed, leaving 1,307 decrees pending execution at the end of the year. This is very unsatisfactory. The Government must again insist on officers of both the Co-operative and the Revenue Departments adopting prompter and more effective measures for the speedy disposal of suits and the execution of decrees.

The accounts of the societies were audited mostly by official agency, and 832 societies were fully audited during the year. Certain serious irregularities such as defalcations and falsification of accounts in several societies were discovered by the auditing staff.

There were two cases of Criminal misappropriation of Societies, Funds, *viz.*, those at Halenahalli and Kodihalli Societies in the Tumkur District. Four more cases of misappropriation were reported during the year. The cases related to the Ooregaum Co-operative Society, the Mosale Co-operative Society in the Hassan Taluk, the Nandidrug Mines' Co-operative Society and the Ramalingeswara Weavers' Society in the Mysore City. These defalcations show that the supervision of the Societies' own Directors and Auditors is often very inadequate, and also point to the need for closer and more continuous supervision on the part of the officers of the department.

Important events.—The Agricultural and Industrial Co-operative Societies in the State participated in the Dasara Industrial and Agricultural Exhibition in October 1919. Thirteen Societies sent exhibits valued at Rs. 5,425, and articles valued at Rs. 1,042 were sold at the Exhibition itself. One of the societies won a gold medal.

No. 10440-99—E. C. 70-20-5, DATED 30TH APRIL 1921.

The 9th Provincial Co-operative Conference was opened in October 1919 by His Highness the Yuyaraja and presided over by Mr. G. K. Devadhar, M.A., Vice-President of the Servants of India Society. The Registrars of Co-operative Societies of Madras, Hyderabad and Coorg were among the visitors to the Conference.

Prizes instituted by His Highness the Yuvaraja were graciously presented by him at the Conference to the best Agricultural Industrial and District credit Societies in the State.

Eight District and seventy Taluk Co-operative Conferences were held during the year along with the District and Taluk Conferences.

Inspectors of Co-operative Societies are reported to have inspected in the course of their tours, 400 Village Improvement Committees and delivered lectures on Co-operation, Sanitation, Education, Agricultural and Industrial Development and other subjects relating to the economic improvement of villages. Government regret to note that attempts made by the Registrar to revive the publication of the Co-operative Bulletin have not proved successful.

Touring.—The number of days on which the Registrar of Co-operative Societies was on tour during the year was 151, which fell short of the prescribed minimum by 29. One hundred and fifty-four Societies, *i.e.*, 77 Rural and 77 Urban Societies were inspected by him during the whole year. The Assistant Registrar, Mysore Division, toured 164 days, and inspected 138 Societies, and the Assistant Registrar, Shimoga Division, toured 163 days and inspected 159 Societies. The touring of the Assistant Registrars was also not adequate the period for which they toured having fallen short of the prescribed minimum by about 76 and 77 respectively.

Concluding remarks.—Government are glad to note that the year under report was generally one of progress in spite of adverse conditions such as the stringency of the money market and the abnormal rise in the prices of food-stuffs. Increased attention is still necessary to the expansion of the movement in the malnad and other backward areas of the State and also to the development of Agricultural, Industrial and other non-credit institutions. Government have since appointed an influential committee to examine the progress of the co-operation in the State, and to submit a detailed report. Government trust that the deliberations of the Committee will lead to the Co-operative movement being placed on a more useful, solid and expanded basis.

K. MATTHAN,

READ—

Government Order No. 13805-8—Medl. 114-20-8, dated 15th January 1921, directing that the Assistant Surgeon at Benkipur be employed to attend solely to the employees at the Iron Works, etc.

2. Letter No. 4221, dated 19th January 1921, from the Tata Iron and Steel Company, stating that the Assistant Surgeon may be directed to take instructions or orders from the General and Construction Superintendent instead of from the District Medical Officers, proposing certain schedule of charges for medical attendance.

Order No. 10301-5—I. S. 33-20-8, dated 26th April 1921.

Government are pleased to direct that the Assistant Surgeon at Bhadravati be placed under the administrative control of the General and Construction Superintendent. In technical and professional matters, however, he will take the orders of the District Medical Officer, Shimoga.

2. The Companies' proposals regarding the schedule of charges for medical attendance as hereunder are also approved :—

- (i) Attendance in all employees either at the dispensary or at their residence to be free.
- (ii) When the medical officer is required to attend on any member of the family of an employee at his residence the charge would be Rs. 2 per visit.
- (iii) No charge would be made when members of the family of an employee attend hospital for treatment.
- (iv) All medicines to be supplied free both to the employees and to the members or their families.

3. The cost of the medicines supplied will be debited to the accounts of the Iron works.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Letter No. 9959, dated the 3rd March 1921, from the Secretary, Mysore State Life Insurance Committee, requesting sanction to the revision of the amounts assurable by policies issued in the Official Branch from ages 31 to 45 as recommended by Mr. George King, Actuary, London.

(To be read in *consensus*.)

Order No. Fl. 6410-58—G. F. 167-20-2, dated 22nd April 1921.

In view of the position disclosed in the actuarial reports on the fund as it stood on 30th June 1918, the Insurance Committee requested Mr. King, with the approval of the Government, to suggest a revision of the rates of contribution.

2. Mr. King considers that no change is called for in the table of rates of endowment assurances for ages up to 30. As regards the rates for ages above 30 to 45 he is of opinion that the present rates of assurances are too large as premiums of the members are not sufficient to provide the sums assured. He has accordingly suggested a revised table of rates in respect of ages above 30 to 45 which the Insurance Committee recommend for adoption.

3. Government accept the Insurance Committee's recommendation and are pleased to accord sanction to the adoption of the revised rates as in the annexure with effect from the date of this order.

M. N. KRISHNA RAO,
Finl. Secy. to Government.

- To—The Comptroller, Mysore Government.
- The Secretary, Mysore State Life Insurance Committee.
- The other Heads of Departments.
- The Deputy Commissioners of Districts.
- The Secretaries to Government.

Exd.—C. R.

No. 9959—Enc. 1 File, dated 1st—3rd March 1921, from T. Satyaraj Chetty, Esq., B.A., Secretary, Mysore State Life Insurance Committee, Bangalore, to M. N. Krishna Rao, Esq., B.A., Financial Secretary to the Government of His Highness the Maharaja of Mysore, Bangalore.

I have the honor to forward herewith for reference and obliging return the marginally noted file relating to the revision in the amounts assurable by policies issued in the Official Branch which Mr. George King, the Actuary, was requested to undertake as sanctioned in Government Order No. Fl. 57-8—G. F. 297-19-2, dated 3rd July 1920.

File containing Insurance Office Memorandum dated 18th December 1920, with the opinion of the Committee recorded thereon and Mr. King's letter dated 21st November 1920 with its enclosure, the revised table of the sums assurable in the Official Branch from ages 31 to 45 and all other connected papers.

I request you to be so good as to obtain early sanction of Government for the adoption of the revised rates as contained in the table furnished by Mr. King with his letter dated 24th November 1920, placed in the file.

The revised rates will come into operation only from the date of Government Order sanctioning their adoption and not retrospectively.

No. FL. 6410-58--G. F. 107-20-2, DATED 22ND APRIL 1921.

Krishnarajasagara Reservoir.

No. Fl. 5991-6039—G. F. 141-20-3, DATED 4TH APRIL 1921.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ AGAIN—

Para 5 of Government Order No. Fl. 7573-62—G. F. 245-16-4, dated 10th June 1918, directing the maintenance of separate Capital and Revenue Accounts of the three channels above the Krishnarajasagara Reservoir.

2. Correspondence ending with unofficial note dated 29th September 1920, from the Chief Engineer, Cauvery Valley Irrigation, pointing out the impracticability of allocating the revenue from the marginally noted three channels above the Reservoir under the heads shown in para 5 of Government Order read above and that the only equitable allocation possible under the circumstances is the allocation under the two classes (a) Revenue from lands under the old canals, (b) Revenue from lands under the extensions and suggesting that as these extensions have been rendered possible in part owing to the supply set free from the lands coming under submersion in the bed of the Reservoir the equivalent extension thus rendered possible may be divided in the ratio of the total extent of lands commanded by each of the extensions of the three channels or in the proportion of capital cost and that all revenue from the new extensions till the expansion of cultivation reaches the figure of 10,200 acres may be credited to the Revenue Accounts of Krishnarajasagara Reservoir, all revenue from extensions over and above 10,200 acres being credited to Revenue Accounts of the extension of the three channels.

3. Letter No. C. 955—19-20, dated 21st February 1921, from the Revenue Commissioner agreeing to the above proposals made by the Chief Engineer, Cauvery Valley Irrigation.

Order No. Fl. 5991-6039—G. F. 141-20-3, dated 4th April 1921.

The proposals of the Chief Engineer, Cauvery Valley Irrigation, concurred in by the Revenue Commissioner are sanctioned.

M. N. KRISHNA RAO,

**Report on the working of the Insurance
Scheme for the year 1918-19.**

No. FL. 6341-89 -G. F. 168-20-2, DATED 22ND APRIL 1921

**PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.**

GENERAL AND REVENUE DEPARTMENTS

READ—

Letter No. 1995, dated 4th March 1921, from the Secretary, Mysore State Life Insurance Committee, forwarding the Report on the working of the State Life Insurance Scheme for 1918-19.

Order No FL 6341-89—G F. 168-20-2, dated 22nd April 1921.

Recorded.

The Report was due on 30th November 1919 and the delay of more than 14 months in its submission should have been avoided.

2. During the year under review there was a considerable increase in the number of policies dealt with, as compared with the previous year, the total number of policies being 1,958 as against 1,585, in the previous year.

3. The receipts and expenditure of the fund during the year amounted to Rs. 6,03,954-7-9, and Rs. 4,15,904-6-0 respectively and the closing balance at the credit of the fund rose from Rs. 42,52,650 to Rs. 45,24,508-2-6.

4. The total number of casualties among insured persons reported during the year was 226 against 113 in the previous year, of which 50 per cent was due to influenza.

5. The percentage of the cost of management to the premium income of the year was 3·01 as against 2·87 and 3·33 in the two previous years and the percentage of the net balance at credit of the Fund after deducting unpaid claims to the total liability rose from 37·19 to 38·26.

6. *Family Pension Branch.*—During the year under review only one subscriber was newly admitted to this Branch for a term pension of Rs. 10 to each of his two nominees.

7. *Public Branch.*—In the Public Branch 358 proposals were received during the year, of which 285 proposals were accepted for an assurance of Rs. 3,91,500. The receipts and expenditure during the year were Rs. 31,764-8-0 and Rs. 5,572-15-6 respectively and the closing balance rose from Rs. 14,721 to Rs. 40,912-9-6.

M. N. KRISHNA RAO,
Financial Secretary to Government

No. FL. 6341-89—G. F. 168-20-2, DATED 22ND APRIL 1921.

ANNUAL REPORT OF 1918-19.

I. I am directed to submit the following report on the working of the Mysore State Life Insurance Scheme for the year ending 30th June 1919. It was due before the end of November 1919 but it took considerable time to satisfactorily work out the various changes sanctioned in G. O. No. 6944-93—G. F. 89-17-2, dated 20-5-1918, in accordance with the suggestions made by the Special Officer Mr. K. L. Datta. This together with the very heavy work which had devolved on the office in examining and sending up the policy index cards for valuation to the Actuary and the dislocation of work brought about by influenza epidemic in the latter part of 1918-19, considerably delayed the work of accounting the premium payments. Owing to these causes, the submission of this report in time had unavoidably to be delayed.

II. As shown in Appendix I, 1951 proposals were dealt with as against 1585, in the previous year; 1147 proposals were accepted and policies issued; 118 proposals were rejected on medical and other grounds; 693 were under disposal at the end of the year. The proportion of accepted proposals to those rejected was as 100 to 10.28 as against 12.12 and 14.26 in the previous two years. Of the 1147 policies issued, 9 were cancelled before completion for the following reasons:—

(i) 8 were cancelled owing to death of the proposers before taking delivery of the policy.

and (ii) 1 owing to the services of the proposer having been dispensed with.

The remaining 1138 policies assure a bonus of Rs. 11,14,216-0-0 for a monthly premium of Rs. 4,005-8-0.

III. (a) Appendix II showing the policies current on 30th June 1919 arranged according to the year of birth of insured could not be correctly prepared in the absence of the policy index cards which were with the Actuary for his valuation till recently. This statement will be correctly prepared and submitted with the report for 1920-21, as there is not enough of time to give it with the report for 1919-1920.

(b) Appendix III showing the policies issued during 1918-19, according to the districts to which they have been issued has been omitted to be attached to this report in accordance with the suggestion of the Special Officer Mr. K. L. Datta contained in paragraph 20 (b) of his report approved in G. O. No. 6344-93—G. F. 89-17-2, dated 20-5-1918. In consequence of this, the remaining appendices to this report have been re-numbered.

IV. The total receipts, vide Appendix III, during the year on account of premium, on fees duplicate policies and interest on the monthly balances, amounted to Rs. 6,03,954-7-9. Adding the opening balance on 1st July 1918, of Rs. 42,52,658-0-9, the total at credit of the Fund amounted to Rs. 48,56,612-8-6. The expenditure during the year amounted to Rs. 4,15,904-6-0. Out of this sum, Rs. 81,300 represents the amount lent to the Public Branch in accordance with G. O. No. FL. 1797—G. F. 29-18-9, dated 2-10-18, for investment in the Second Indian War Loan in pursuance of the Scheme to issue 10 year Endowment Policies sanctioned in Government Notification No. FL. 400—G. F. 209-17-70, dated 17-7-18, and Rs. 34,000 paid for the purchase of War Loan Bonds under G. O. No. FL. 267—G. F. 209-17-67, dated 13 July 1918, in the Official Branch. As against these amounts treated as expenditure and representing the value of bonds purchased the bonds held form part of the assets of the Fund. (Vide details furnished in Appendix III and the two sub-statements attached thereto.) The balance in favour of the Fund at the close of the year thus amounted to Rs. 44,40,708-2-6 in cash and Rs. 83,800 in War Loan Bonds' face value) treated as loan, making a total of Rs. 45,24,508-2-6. The percentages of the years total expenditure and the cost of management to the closing balance were 7.34 and .30 as against 6.33 and .29 and 4.11 and .34 in the previous two years respectively. The percentage of the cost of management to the premium income of the year was 3.01 as against 2.87 in the previous year.

The percentage of the net balance at credit of the Fund after deducting unpaid claims to the total liability rose from 37.19 to 38.26.

V. (a) In addition to deaths reported to end of 1917-18, of 1410 insured holding policies assuring Rs. 12,21,365-2-0, 226 insured holding policies assuring Rs. 2,30,937-12-0, were reported dead during 1918-19, bringing the total deaths and the sum assured from the commencement to 1636 and Rs. 14,52,302-14-0 respectively. In addition to the heirs of 1,269 insured who received 11,19,118-4-4, to end of 1917-18, the heirs of 188 insured received 1,70,887-8-8 during the year 1918-19 bringing the total number of the deceased whose heirs received payment to end of 1918-19 to 1457 and the amount to Rs. 12,90,005-3-0. There remained to pay to the heirs of 179 insured a sum of Rs. 1,62,297-1-0 at the end of 1918-19.

No. FL. 6341-89 --G. F. 168-20-2, DATED 22ND APRIL 1921.

Note— Of the 226 deaths referred to above, 114 were due to Influenza and 15 and 17 to fever and plague respectively. These causes alone contributed 64.6 per cent of the total reported deaths.

(b) 488 insured persons received Rs. 7,72,543 on the maturity of their policies at their 55th year to end of last year. In the year under report of another 118 persons including those whose cases were in course of disposal, 70 persons were paid 1,39,359 bringing the total number of persons and the amount paid from the commencement to 558 and Rs. 9,11,902 respectively. The claims of 43 persons for Rs. 32,393 were in course of settlement.

(c) To end of last year, 259 persons whose policies assured 2,66,451 received surrender value of Rs. 60,812-14-9. During 1918-19, the policies held by 30 persons assuring Rs. 29,373 were dealt with for payment of surrender value of Rs. 8885-12-8. Of these 21 persons received 7804-12-2 leaving the claims of 9 persons for Rs. 1081-0-6 in course of settlement.

VI. In Appendix VI are sent forth the particulars of the total number of policies issued, lapsed and remaining effective to end of June 1919. It also shows the liability created, discharged and remaining. The number of policies that remained incomplete on the 30th June 1919 is shown separately.

VII. The sums assured referred to in paragraph (a), (b) and (c) *supra* include the Reversionary Bonus Addition also and thus out of the total Reversionary Bonus Addition of Rs. Rs. 5,67,903 declared to end of June 1912, Rs. 1,04,008 was actually paid.

VIII. The Committee held two Meetings during the year for transaction of business.

IX. A copy of the Report of the Auditors who examined the books of the office for the year 1918-19 is herewith forwarded for information.

FAMILY PENSION BRANCH.

X. During 1918-19, one subscriber was newly admitted to this branch for a term pension of Rs. 10 to each of his two nominees. Out of the previous 10 subscribers who were given the option to convert their subscription to the revised rates (*vide* paragraph 10 of the last year's Report) 4 availed themselves of it and the remaining 6 continued to pay at the old rates. The monthly subscription payable by all the 11 subscribers was Rs. 76-7-1.

XI. The monthly pension of Rs. 60 to the nominees of a deceased subscriber alluded to in the last year's report, was continued to be paid during the year under report.

XII. The income amounted to Rs. 1008-3-4 of which Rs. 104-15-2 was the interest on the monthly balances. The expenditure amounted to Rs. 720. The closing balance was Rs. 3184-7-5 *vide* statement attached.

PUBLIC BRANCH.

XIII. During 1918-19, 358 proposals were received under all the four schemes for a total assurance of Rs. 4,69,775. These along with the 305 for Rs. 2,84,950 pending at the beginning of the year, were dealt with. 285 for Rs. 3,91,500 were accepted; 58 for 69,800 were either declined or cancelled and 320 for Rs. 2,93,425 were left pending *vide* statement I attached. Statement II shows the proposals dealt with from the commencement of the scheme.

XIV. Among the 285 accepted cases, 245 resulted in issue of policies assuring Rs. 3,36,300 on payment of first premium. The annual premium realisable by these 245 policies was Rs. 20,434-2-0.

XV. Ten insured persons were reported dead, 8 of influenza and 2 of plague. The assurance in their cases amounted to Rs. 18,200. Out of it, Rs. 3000 was paid to the heirs of 4 of these insured in proof of claim and the balance of Rs. 15,200 was pending payment.

XVI. Four insured persons who took out Children's Endowment policies under the "D" Scheme assuring Rs. 3,000, reported the death of the beneficiaries and in one of these cases the premium paid was refunded. Two insured persons surrendered their policies assuring Rs. 5,700 and received surrender value.

XVII. The income during the year amounted to Rs. 31,764-8-0 inclusive of interest of Rs. 1,011-1-9 on the monthly balances of the Fund. The expenditure amounted to Rs. 5,572-15-6. The balance left in favour of the Fund was Rs. 40,912-9-6 *vide* Statement III. Besides this, Second Indian War Loan Bonds of the face value of Rs. 81,300 are also held in reserve against the 10 year Endowment policies of same value issued in pursuance of Government Notification No. FL. 400—G. F. 209-17-7, dated 17 July 1918, the cash for which has been lent by the Official Branch as sanctioned in G. O. No. FL. 1797—G. F. 29-18-9, dated 2 October 1918 (*vide* para IV *supra*).

No. Fl. 6341-89—G. F. 168-20-2, DATED 22ND APRIL 1921.

READ—

Letter No. G. A. D. 124, dated 20th August 1918, from the Comptroller, requesting with reference to note 2 to Article 634, Mysore Service Regulations, that the list of Semi Malnad areas may be incorporated in the Service Regulations.

2. Government letter No. Fl. 331—S. & A. 17-20-1, dated 17th July 1920, to the Revenue Commissioner in Mysore.

The question of revising and clearly specifying areas, entitling officers of Government to claim special rates of travelling allowance under Article 634 of the Mysore Service Regulations, has been under the consideration of Government for some time past. The present definition of malnad tracts as contained in Article 633, Mysore Service Regulations under which specified parts of taluks are treated as malnad does not help much in the audit of travelling allowance bills as the Audit Office will not be in a position to decide definitely whether halts and journeys for which special rates of daily allowances are claimed, are really in the localities coming under the definition. To simplify the rules and make them more clear, Government desire that a list completely enumerating the localities which should be treated as special for purposes of admitting enhanced rates of allowance for journeys and halts in them should be made and that in preparing this list regard should be had to the following consideration:—

If more than half a taluk is malnad, the entire taluk should be treated as a special tract for purposes of enhanced travelling allowances, while if less than half a taluk is malnad, the whole should be treated as an ordinary tract. I am directed to request you to kindly submit to Government a complete list as above at a very early date.

3. Letter No. 341—Gl. 20-21, dated 20th January 1921, from the Revenue Commissioner in Mysore, furnishing a list of tracts which may be treated as malnad for purposes of claiming special rates of travelling allowance under Article 634, Mysore Service Regulations, in accordance with the directions given in Government letter read above.

Order No. Fl. 6040-88- S. & A. 17-20-3, dated 4th April 1921.

Government approve of the proposals of the Revenue Commissioner in Mysore and direct that Articles 633 and 634, Mysore Service Regulations, be amended as in the Addenda and Corrigenda slip annexed to this order.

M. N. KRISHNA RAO,
Financial Secretary to Government.

To—The Comptroller, Mysore Government.
The Revenue Commissioner in Mysore.
The other Heads of Departments.
The other Secretaries to Government.
The Deputy Commissioners of Districts.

Exp.—C.L.

No. Fl. 6040-88—S. & A. 17-20-3, DATED 4TH APRIL 1921

ADDENDA AND CORRIGENDA TO THE MYSORE SERVICE REGULATIONS.

IV EDITION.

Page 223.

Substitute the word " Special " for " Malnad " in the Heading of Chapter XXXV.

Page 223—Article 633.

Delete this article.

Page 223—Article 634.

Substitute the following for this article and the notes under it. Daily allowance for journeys and halts in special tracts, including Kolar Gold Fields area, will be increased as follows:—

(a) Officers whose salary is Rs. 250 and above 25 per cent.

(b) Other officers including inferior servants 50 per cent.

NOTE 1.—A list of special tracts is given in Appendix .

NOTE 2.—The rate of allowance of an officer who spends part of a day in one of these localities and part in a place in which the ordinary rate prevails, is determined according to the place where he halts after the journey

NOTE 3.—Officers in superior service whose pay is not more than Rs 100 and menials are entitled while travelling in the South Canara District, to draw increased daily allowance at twice the ordinary rates subject to the maximum of Rs 1-4-0

NOTE 4.—Upper and Lower subordinates, Taluk Mestris and Tank Inspectors are entitled to double their permanent monthly travelling allowance when residing in the special tracts, subject to a maximum of Rs. 30.

APPENDIX.

List of special tracts referred to in Article 634.

- (1) *Kolar District*.—Kolar Gold Fields area.
- (2) *Mysore District*.—(a) Heggaddevankote Taluk.
(b) Hunsur Taluk.
- (3) *Hassan District*.—(a) Manjarabad Taluk.

READ—

Note No. R. C. 56 of 20-21, dated 5th April 1921, from the Muzrai Superintendent in Mysore, submitting for sanction proposals for a revised scale of income and expenditure in the Sri Kodandaramaswami temple at Hiremagalur, Chikmagalur Taluk, together with his Memorandum thereon, and stating that the proposals were drawn up after personal inspection and enquiry and that the Deputy Commissioner, Kadur District, who was consulted in the matter, states that the scale is suitable and may be adopted.

NOTE.

I submit herewith proposals for the revision of the scale of income and expenditure in the temple of Sri Kodanda ramaswami at Hiremagalur, Chikmagalur Taluk.

2. These proposals were drawn up by Mr. G. Aravamudiengar after a personal inspection and enquiry and in consultation with the local officers, Dharmadarsis and other persons interested in the institution. The Deputy Commissioner of the Kadur District who was consulted in this office letter No. 1380-2, dated 11th January 1919, states in his reply dated 19th March 1921 that the scale is suitable and may be adopted.

3. The Deputy Commissioner has also forwarded the petitions presented by the Tengalai Sri Vaishnavas praying (1) that the allowance to the archak of the Sri Ramanujachar and Alwar Sannidhis may be fixed at Rs. 5 instead of Rs. 2 and (2) that provision may be made for the Firunakshatram of Manavala Mahamuni or Jeer. As regards the first prayer, it is not possible to raise the allowance to Rs. 5, as the inam lands endowed to Ramanujachar and Alwar Sannidhis yield an income of only Rs. 60 and the whole of it is proposed to be utilized for expenditure in the temple as shown in the draft scale submitted herewith. No portion of it is available for making the increase prayed for. As regards the second prayer, a compromise was effected by the Deputy Commissioner on 28th February 1917, between the Vadagales and the Tengalays and the material portion of it so far as it relates to the present matter is that unless and until the tasdik patti fixed on 13th July 1897 is modified by Government, the long existing mamul of not offering any special worship on the Jeer Tirunakshatram day should not be departed from. The Tengalays who were parties to this compromise and agreed to this decision preferred an appeal to Government, but the appeal was rejected in Order No. 931—M. F. 214-15-9, dated 21st September 1918. No new grounds have been urged for a reconsideration of the above order and even now there is no Vighraha of Manavala Mahamuni or Jeer in the temple. Without an idol, no worship can be conducted.

4. The Memorandum attached to the scale explains the scope of the revision and I request the kind sanction of Government to the said proposals.

MEMORANDUM.

Revision of the scale of expenditure of Sri Kodandaramaswami temple at Hiremagalur, Chikmagalur Taluk, Kadur District.

Though the institution may not strictly fall within the category of major institutions as its regular income may be slightly less than the minimum limit of Rs. 1,000, yet it should be treated as such owing to its local importance and situation at the District Headquarters.

2. The institution has a cash grant of Rs. 290-15-0, but has besides considerable income from Sirkar and Inam lands and miscellaneous collections not to mention certain Pudukat deposits in Savings Bank, a portion of the income upon which is available for general expenditure.

3. No material change is proposed to be made in the establishment or its cost excepting some small increases to the pay of the Archak, Paricharak, Golla and Kaval.

4. Under Nityakathe the provision for Paditara and Diparadhane is raised from Rs. 8 per mensem to Rs. 13.

No. 3792-4—Muz. 488-20-2, DATED 25TH APRIL 1921.

5. Small increases have also been allowed under Hetchukatte expenditure and expenses for Santarpane have been kept out of the account as they are to be paid for out of a private puduvat.

6. The total expenditure under the proposed scale is Rs. 866 as against Rs. 755 in the existing scale or Rs. 111 more than the latter out of which Rs. 31 represents the contribution to the Muzrai Establishment Fund at $3\frac{1}{2}$ per cent on the total income. The net increase is therefore only Rs. 80.

7. The Institution had a minus balance of Rs. 93-14-6 against an invested surplus of Rs. 5,974-5-0, on 30th June 1918.

Order No. 3792-4—Muz. 488-20-2, dated 25th April 1921.

Government consider the proposals of the Muzrai Superintendent suitable and are pleased to accord sanction to the same.

T. E. JEYARAMA IYER,
Secy. to Govt., Muz. Dept.

To—The Muzrai Superintendent in Mysore, returning the enclosures.

The Deputy Commissioner, Kadur District.

The Comptroller to Government.

Exd.—C. R.
